**Release 14.3 (03-04-2026)****Minor Changes**

- A new option in **Page Settings** allows the system to automatically use the same number of copies for the second format as defined for the first invoice during printing.

**Bugs**

- An issue was observed where duplicating an existing **Sale Type/Purchase Type** for **Pakistan** resulted in an error, while creating a new one worked correctly. This issue has now been resolved.
- While importing vouchers through **Excel**, the **TDS amount** applied on the **taxable amount** was not properly considered in the **TDS Reference window** when **TDS Bill Sundry** was used along with **CGST and SGST**. This behaviour has now been corrected.
- After changing the Financial Year (F.Y.), the default Tax Category configured in Masters is removed instead of being carried forward when an effective date (w.e.f.) is specified. However, the system behaves correctly for newly created Tax Categories. Now issue rectified.
- An error occurred during **bulk invoice upload to Google Drive** in **BUSY Online**. Now issue rectified.

[Back](#)

**Release 14.2 (03-03-2026)**

**Bugs**

- An RTE-91 error was encountered when switching the Financial Year with New & Changed Masters selected. The issue has now been fixed.
- From **version 14.1**, when **e-Invoice applicability** was not enabled in the invoice, the **e-Invoice QR Code** field printed "**No Image**". Now, the field will remain blank as in earlier versions.

[Back](#)

**Release 14.1 (22-02-2026)****Major Changes for Mobile App**

- Now, users can enable the **same voucher series** feature in Busy for posting vouchers in **Mobile App and BUSY Desktop**, ensuring consistent and uniform voucher numbering across platforms.
- Now User can create Purchase & Purchase return Vouchers in Mobile App.

**Minor Changes**

- The **“Refer & Earn”** feature has been introduced in the Busy Desktop, allowing users to initiate customer referrals directly after login. Users will earn referral credits upon successful activation of the referred customer.
- Minor changes have been implemented in the Change Softlock Email/Mobile process for smoother and more reliable operation.
- Now, users can **download a sample Excel sheet for importing Payment & Receipt Vouchers** as well. Earlier, this facility was available **only for Inventory Voucher imports**.
- Now, when the **F4 key** is used to pick items in POS and the **barcode-based item name** option is enabled, the system will show additional **item information** for better clarity and faster selection.
- Minor Changes in Sale without Order Report.
- A provision has been made to **include sales made against challans** while calculating the **Top 5 Items transactions** on the user dashboard. Earlier, only **direct sale invoices** were considered.
- A provision has been made to **record an entry in the Event Log whenever a user is deleted**, ensuring better audit tracking.
- Minor changes in Profitability reports.
- The **“Re-carry forward balances” prompt**, which was introduced in **version 13.8**, has now been **removed** as it was **time-consuming** while verifying balances from the previous financial year.
- Provision has been made to send WhatsApp messages using the **configured “BusySMS” format** instead of the default format while sharing through **Update Transport Details (Misc. Data Entry)**.
- A provision has been made to show item values in the Production Variance Report, enabling better variance analysis.
- A new provision has been introduced to show the value of items in the Horizontal Item Monthly Summary Report, providing better analysis.

**Bugs**

- While sharing WhatsApp messages through **Offline E-mail/SMS Utilities**, the message content was not displayed properly when the “**Send PDF Link for Invoice**” option was disabled. This issue has now been resolved.
- The **Payment QR Code** and **e-Invoice QR Code** were not printing in a single row on the invoice. This issue has now been resolved.
- In **Nepal**, the **IT PAN number** was not getting updated when the party was selected using **F4** under **Billing/Shipping Details**. This issue has now been resolved.
- The message “**PDC Date is out of range in Current F.Y**” appeared while selecting a voucher under **PDC Details → Miscellaneous Data Entry** when the system date format was other than **DD/MM/YYYY**. This issue has now been resolved.
- In a few cases, **RTE-6** occurred while viewing **On-Enter Details** of an item after loading the **Stock Status → Balances Only** report with the **Show Zero Stock Items** option enabled. This issue has now been resolved.
- **RTE-438** was generated while reconciling a voucher in the **Account Ledger** when the ledger was accessed by drilling down from the **Balance Sheet**. This issue has now been resolved.
- In the **BCN-wise Profitability Report**, when generated for a **specific date range**, the **Qty. Out** and **Amount Out** were incorrectly shown for the **entire financial year** instead of the selected period. This issue has now been resolved.
- **RTE-3354** was generated while checking the **Profitability Report (Item-wise)** when “**Item to be shown by**” was set to **Alias** and some items did not have an alias defined. This issue has now been resolved.
- An **RTE-13** error was generated when an invalid **time range** was entered in the **Scheme Configuration**. The issue has now been fixed.
- The “**Restrict Back Date Entries**” configuration was not being saved under **User Configuration** when no voucher series was specified. This issue has now been resolved.
- **RTE-3407 (Record is too large)** occurred in the **Audit Trail** when a voucher was modified multiple times (more than 15 times). This issue has now been resolved.
- In **Query on Transaction**, when a voucher was selected from the **second row onwards**, a **blank Receipt** opened instead of the selected voucher. This issue has now been resolved.
- In the **Sales Analysis** report, the **Average Price** was not calculated correctly when any row was hidden using the **F9** key. This issue has now been resolved.
- In the **Standard Invoice** configuration for **Saudi Arabia**, the caption “**Print E-invoice QR Code**” overlaps with another option. Now rectified.
- Minor issues have been rectified in *Day end Report(Summary & Detailed)*.
- In some cases, **RTE-9** was generated while importing Excel for **Auto Bank Reconciliation** when the number of records exceeded **1000 in Excel**. This issue has now been resolved.

[Back](#)

## **Release 14.0 (12-02-2026)**

### **Major Changes**

- Changes have been implemented in the GST calculation mechanism for most tobacco products and Pan Masala in accordance with the amendments effective 1st February 2026

### **Bugs**

- In **BUSY Online**, users were unable to save the image/Logo in the **Standard Invoice Printing configuration**. This issue was occurred in **version 13.8** and has now been resolved.

[Back](#)

**Release 13.9 (07-02-2026)**

**Bugs**

- In the **Standard Invoice** configuration for **Saudi Arabia**, the caption "**Print E-invoice QR Code**" overlaps with another option. Now rectified.

[Back](#)

## Release 13.8 (31-12-2025)

### Major Changes

- From now on, the following features will be available **only when BLS is active**
  - Printing of Customized Invoice Formats
  - Add/Modify Formats, Custom Columns
  - Customization, Custom Reports, User Activity Log, SQL Query
  - Switching of Users
  - Import/Export for Masters and Vouchers
  - Bulk Updation Menu
  - Bank Reconciliation Report
  - Salesman/Broker-wise Reporting

This linkage ensures controlled access to advanced features based on BLS status.

### Minor Changes

- Earlier, even sub-users without any **Housekeeping rights** were shown the **Housekeeping process required** warning at company login. Now, this warning will appear **only for the main user or sub-users who have Housekeeping permissions**.
- The following countries have been added to the country list: **Togo, Georgia, and Kazakhstan**.
- A provision has been made to **restrict the selection of Bill Sundries** other than **'Round Off' nature** in **Voucher Series Configuration** when the **"Auto Round-Off Final Amount"** feature is enabled. This ensures accurate rounding and prevents incorrect sundry selection.
- While printing barcodes (Add-On) from vouchers, the voucher list was earlier displayed based on the **voucher date**. Now, the list will be shown as per the **stock updation date used in the voucher**, similar to the listing of **purchase vouchers**.
- Now, a **warning message** will pop up if **Microsoft Excel is not installed** on the system while using **Excel-related features**. This helps users understand why the feature cannot be executed.
- Earlier, there was no provision to update **Voucher Optional Fields** from **Miscellaneous Data Entry** for **Sales Orders, Purchase Orders, Sales Quotations, and Purchase Quotations**. Now, this provision has been added.

### Bugs

- The field **"Original Sale/Purchase Date"** in the Sales Return Register (Columnar format) and other reports was not working correctly when the system date format was set to **DD-MMM-YYYY**. This issue has now been resolved.

- While using the *Tax Inclusive Price* feature in the Item Master along with the *Item Quantity-wise Discount* structure, the price was being picked incorrectly at the time of voucher entry. Now problem rectified.
- The captions for *Supply Inward* and *Supply Outward* were not displayed correctly when the option “**Show captions of Sale/Purchase vouchers as Supply Outward / Supply Inward**” was enabled from GST/VAT configuration. This issue has now been resolved.
- **RTE-380** was occurring while adjusting the **BOM in Production / Unassemble vouchers** when the number of items entered exceeded the configured maximum item entries. This issue has now been resolved.
- The user signature image was slightly misaligned and shifted outside the signature box when vouchers were printed with the **Payment QR Code**. This problem started from **13.7** and has now been corrected.
- Special characters were not allowed while saving the **Company Short Name** in *Modify Company*. However, during **WhatsApp** or **BNS** sending, the system prompted for the short name (if not already defined) and incorrectly allowed saving special characters. This issue has now been fixed.
- In a few cases, an RTE occurred while generating the **Sales Analysis** report for **One Party Group** when the **Show GST Amount** option was enabled. This issue has now been resolved.
- When the option “**Show Voucher Long Narration in Report**” was enabled, **RTE-457** occurred while opening **Multi-Company Results → Bill Receivable → Group of Accounts → Bill-Wise (Combined)**. This issue has now been resolved.
- While creating company in the **Nepali Region**, the **User Activity Log** was displaying all entries with the same date, although the details appeared correctly when a specific date was selected. This issue has now been resolved.
- Users were prompted with the “**Re-carry forward balances**” message while logging into the company, despite having already completed the carry-forward process. This has now been fixed.
- In the **Single Column Cash/Bank Book** report, the **Opening Balance** was not displayed correctly when the **PDC Voucher** option was enabled and the report was viewed for a selected date range. This issue has now been resolved.

[Back](#)

## Release 13.7 (08-12-2025)

### Major Changes

- A new provision allows users to generate Balance Sheet and Profit & Loss Account in Schedule III or Non-Corporate format. Users can conveniently tag accounts or groups using the F4 key to customize classification.

### Minor Changes

- A new Issue/Receipt Analysis report (Detailed & Summary) has been introduced under Bardana/Crate Management to help users easily track and analyse the movement and balance of Bardana/crates.
- Now, users can create **multiple voucher series for Mandi** under a single voucher type. Earlier, only the **predefined voucher series** could be used. This enhancement provides greater flexibility and customization in voucher management.
- In the **Mandi Add-On**, a new report titled '**M Form**' has been provided. This report helps users easily track and manage **mandi-related transactions** in a structured format.
- A provision has been made to display a clear and informative error message when data(GSTR-2A & Invoice Data from IMS) cannot be fetched from the GST portal due to high invoice volume. Earlier, the system showed a blank message, causing confusion for users.
- Now, a provision has been made to display Sale Price details in the Batch-wise Closing Stock Details Report, similar to how MRP is shown. This gives users a clearer view of both selling price and MRP
- Agent wise Receivable report has been optimised.
- Now, when a user changes the Currency Decimal Places, a warning message will appear on the configuration page: "*Changing Currency Decimal Places may cause mismatches in reports. Do you still want to continue?*" This ensures users are aware of possible report discrepancies.
- Now, if the invoice logo name or logo path is changed, the system will display a warning message while saving the invoice format. This helps avoid unintentional changes to logo settings.
- While configuring auto-generation of Print Name, an incorrect warning message—'Total length of print cannot be greater than 40'—was appearing. The limit has now been increased to 60,
- A new provision has been made to display the alias of the Bill of Materials (BOM) in the list for easier identification.
- Now, a provision has been made to display a "Cancelled" image while printing cancelled vouchers. This helps users easily identify cancelled documents in printed copies.

- Now, Item Descriptions entered in BUSY while creating vouchers will also be synced with the Mobile App. This ensures consistent item information across both platforms.
- A provision has been made to allow updating the **Pincode** in **Transport Details** during voucher entry. Earlier, the Pincode did not update unless the **E-Way Bill** feature was enabled.
- A new report has been introduced to help users identify items where tax rates have been changed in Tax Category master. This report provides a clear view of all affected items, enabling users to track and verify tax rate changes for better compliance and accuracy in reporting.
- A new provision has been made to print a QR Code for receiving payments via UPI ID in Account Ledger and Invoice Printing. This simplifies digital payment collection and can be configured from Features & Options → General Tab.
- A warning message will now be displayed at the time of company login if any modifications or changes have been made in the previous financial year, prompting the user to update the financial year along with the new or updated master data.
- In the Softlock email/mobile change process, if a user mistakenly enters a serial number or numeric value instead of a valid email address, the system previously allowed the update without any warning. Now, a validation has been implemented to restrict invalid entries and ensure that only valid email formats are accepted.
- A new provision has been added to display critical level warnings at the parameter level. Earlier, the system only showed warnings based on the critical level defined for items. This enhancement ensures more accurate and parameter-specific stock monitoring.
- Minor changes in Bulk voucher creation for Receipt utility.
- If Alternate Units are enabled and Quantity Decimal Places are set to 0, a warning message will now appear recommending users to set at least 2 decimal places for accurate calculations and proper unit conversions.
- Earlier, BUSY allowed users to enter values exceeding six digits (including decimals) in account master for specifying Depreciation Rate, which caused the value to appear as asterisks (\*) on the screen. Now, a restriction has been applied to prevent entry of excessively large values, ensuring clear and accurate data display.
- Now a provision has been made so that while sending messages to WhatsApp, the system will pick the WhatsApp number instead of the mobile number, ensuring correct message delivery.
- Now, Scheme Master items will pick tax rates automatically from the Tax Category Master, based on the effective date of tax changes, ensuring accurate tax calculation for free or promotional items.
- Previously, when opening a company, if GSPs were not configured, the system displayed a message and redirected the user to the GST/VAT Configuration page. Now, this process has been improved — on pressing 'Yes', the system will directly open the GSP Configuration form, making the setup faster and more intuitive.
- Minor changes in Sales analysis report for Parameterized details.

- The system now displays a warning alert while saving a voucher if all included item masters are marked with “Skip in GST” during E-way Bill or E-invoice generation, helping ensure GST compliance.
- A warning alert will be displayed during voucher saving if the “Skip in GST” option is enabled for all item master used in the voucher.
- Performance has been optimized for voucher opening in LAN Mode, resulting in faster loading and smoother operation during multi-user access.
- An Option has been provided in to download and view TDS/TCS details from the GST portal.

### Bugs

- In a few cases, an RTE occurred while creating parties through the utility during bulk creation of inventory vouchers. This issue has now been fixed.
- While configuring the Columnar Register, the caption for the field ‘Qty\_Grand\_Total (Main)’ was not being displayed fully. This issue has now been fixed
- In BUSY Online, an issue where the E-Invoice QR code appeared only on some copies while printing multiple pages. The QR code will now be displayed correctly on all printed copies of the Invoice.
- In the Ageing Receivables (FIFO Basis) report, the branch-wise filter was not working correctly when the report was generated for a single party. This issue has now been fixed.
- Payment vouchers with tag "Against Reverse Charge Invoice" were not visible while checking the list of Payment vouchers. Now issue has been rectified.
- An RTE-3146 error was encountered when generating the Sales Analysis report with “Sales Only” or “Sales Return Only” options and the “Exclude Stock Transfer Sale Type Entries” setting enabled. The issue occurred specifically in the Client-Server edition. Now problem rectified.
- When the user tries to print Bank accounts through *Printing* → *Account Ledger* → *Selected Group* for a Bank/Cash Account, the output is coming blank. This issue has now been fixed.
- While importing vouchers from Excel, an RTE occurred if more than 999 rows were specified for a single voucher. Now, in such cases, a warning message will be displayed.
- In the current version, no warning message appears when a voucher is created with a duplicate serial number. This functionality was working correctly in BUSY 21 Release 13.0. Now problem rectified.
- RTE-5 error was generated when pressing “OK” on the “Invalid Sheet Number” message while importing vouchers from an Excel sheet. This issue has now been fixed.
- In a few cases, RTE-3146 occurred while running *Query on Transactions*, and this issue was found only in the Client-Server edition. The problem has now been fixed.
- RTE-91 occurred while adding a Mandi transaction when the Free Quantity feature was enabled. This issue has now been fixed.

- In a few cases, while adjusting challans in the Sales Voucher, the system displayed the error message “All items have not been fully adjusted against the challan,” even when the option "*Consolidate Items while Picking from Challans*" in Features/Options was enabled. This issue has now been fixed.
- The user was unable to attach multiple external files using a semicolon while sending an email. This issue has now been fixed.
- While checking the Balance Sheet, the Assets and Liabilities were showing a mismatch whenever the Book Commencing Date was different from the Financial Year Start Date. This issue has now been resolved.
- RTE-91 was being generated when clicking on a Custom Column in the Account Ledger Columnar Report. This issue has now been fixed.
- In Print Utilities, when a branch user printed invoices with the “All Series” option, the system incorrectly included other voucher series not mapped to that user. The problem has been resolved.
- Sales/Purchase Quotation vouchers could not be saved when the option “*Hide Alternative Unit Details in Voucher*” was enabled. Now problem rectified.
- When branch users printed an accounting voucher, the footer incorrectly displayed the company name. Now it has been resolved.
- A new validation has been introduced in the **Change Email/Mobile** form to ensure that mobile numbers entered for Indian users must be exactly **10 digits**. Previously, no validation was applied, which could lead to incorrect or incomplete entries.
- The “**Include Unapproved (Unposted) Entries**” option in the Ageing Receivable/Payable report is not working. The report shows the same output whether the option is enabled or disabled. Now issue has been resolved.
- When printing the Balance Sheet with the ‘Schedules for Fixed Assets’ option, the initial preview showed the correct portrait layout; however, viewing the preview again displayed it in landscape mode. This issue has now been resolved.
- In the *Parameter-wise Critical Level (Minimum/Maximum/Reorder)* report with **Consolidated MC**, the **Closing Stock** was appearing incorrectly because Sales and Purchase Orders were also being included in the calculation. This issue has now been resolved.
- RTE-91 was occurring while printing the barcode for a cancelled Stock Journal voucher. The issue has now been resolved.

[Back](#)

## Release 13.6 (16-10-2025)

### Major Changes

- Users can now **freeze data at the account level**, in addition to the existing options for full data and voucher series-level freeze. This allows users to **lock specific party balances** to prevent any backdated modifications after reconciliation.

### Minor Changes

- Now, **Additional Aliases** created for Item and Account master in **BUSY** will also be **synced with the Mobile App**. This ensures consistent item and account identification across platforms.
- Minor Changes in License validation.

### Bugs

- In a few conditions, while partially adjusting quantity in vouchers related to consignments, the amount was being calculated incorrectly. This issue has now been resolved.
- While viewing the list of Sales Return vouchers, the quantity was appearing as negative. Now problem rectified.

[Back](#)

## Release 13.5 (09-10-2025)

### Minor Changes

- **Enhancements in Company Setup and Voucher Configuration**
  - Default Settings in New Company Creation
    - Now, while creating a new company, Item-wise Discount will be enabled by default in Purchase Vouchers, and the Auto Round-Off option will also be enabled by default with configuration. This helps users to start with commonly used settings already in place.
  - Update Discount Button Behaviour
    - Now, when users click the “Update Discount” button in a voucher, the system will prompt them to configure the setting and will open the corresponding Series Configuration window. This ensures users can directly access and update related configurations.
  - Voucher Renumbering Safety Prompt
    - While performing voucher renumbering, the system will now display a message suggesting the user to take a backup, similar to the prompt shown during the Rewrite Books operation. This helps prevent accidental data loss.
  - Audit Trail Dependency on Numbering
    - If Audit Trail is enabled, then for voucher types where the numbering configuration is currently set to *Not Required*, the system will now automatically switch it to Manual. This ensures compliance with audit requirements.
  - POS Configuration Clarification
    - A label has been added below the “Skip Item Qty Unit” option stating: “*This feature is not available for POS.*” This helps avoid confusion while configuring POS-related settings.
  
- Now, a provision has been made to include **Sales Return** entries in the **Sales Register** under **Inventory Books**. This gives users a complete view of sales-related transactions in one place.
  
- While mentioning TDS bill sundry in a voucher, if no category was specified in that account, the warning message showed '**Invalid TDS Category**'. Now, the account name has also been included in the message for better clarity in identifying the issue.

### Bugs

- While regenerating dual vouchers from the utility section, the accounting details for Material Issue/Receipt vouchers were getting removed. This issue has now been fixed.
  
- In few cases, RTE 3146 occurred while generating Sales Analysis report for One Party Group. Now problem rectified.
  
- In the "Finished Goods to be Received" report, pending references were still being shown even after they had already been adjusted. This issue has now been fixed.

- On a few operating systems, while copying masters from another company, the alignment of certain controls was not proper. This issue has now been fixed.
- Vouchers were not being generated from Opening Challan references through the utility if those references were carried forward from the previous year and the financial year was split. This issue has now been resolved.
- In a few scenarios, the MSME Audit Information report was not displaying the data correctly. This issue has now been fixed.
- While updating transport details under Miscellaneous Data Entry, not all voucher series options were appearing. This issue has been occurring since version 13.2 and has now been resolved.
- While viewing the Sales Analysis Report item-wise (Standard – Date/Voucher wise), the “Qty” column for parameterized details was showing negative values when a Sales Challan was adjusted in a Sales Voucher. This issue has now been fixed.
- In a few cases, while printing invoices in BUSY Online, the e-Invoice QR Code was not getting printed on all pages or copies. This issue has now been resolved.

## Release 13.4 (29-09-2025)

### Changes for Mandi AddOn

- **Self Purchasing in Auction Transactions**
  - A provision has been made to allow Self Purchasing in Auction-based transactions. This provides businesses with more flexibility in handling auction entries.
- **Automatic Adjustment of Accounts & Inventory**
  - A new configuration has been provided for automatic adjustment of Accounts and Inventory in auction transactions. This reduces manual effort and ensures accuracy.
- **Buyer Weight in Auction Purchases**
  - Now, a provision has been made to specify Buyer Weight for Auction-related purchases. The same will be reflected automatically during Auction-related Sales.
- **Interest Calculation Report**
  - A new Interest Calculation Report has been introduced, based on Bill-by-Bill details. This helps users track interest more effectively.
- **Optional Fields & Item-wise Description in Mandi Vouchers**
  - Now, users can enable Voucher Optional Fields and Item-wise Descriptions in Mandi Vouchers. This provides more flexibility and allows detailed entry options.

### Minor Changes

- Provision has been made to create tax category of 40% while creating new company as per amendment in GST 2.0.
- A provision has been made to check for duplicate uncleared cheque entries based on instrument details along with short narration. This ensures more accurate detection of duplicate entries.
- A Label has been specified on the *License Activation page* for Partner code input.

### Bugs

- Currently, when a company is created with Nepal as the country in Express edition, the Transaction menu gets hidden. This issue has now been fixed.
- While printing the Receipt Register (as it is from the grid) and saving it as a PDF with multiple copies, the Grand Total field was displaying incorrect values. This issue has now been fixed.
- In the System Information under the Company menu, the BUSY Model was being shown as "NA" for subscription-based licenses. It should correctly display the model as "Subscription". This issue has now been fixed.
- While configuring cheque printing settings, if the user specified the margin as 0, the program was not saving the value. This issue has now been fixed.

- In few cases, while opening BUSY a RTE 380 occurred. This issue occurred on Windows 7. Now problem rectified.

[Back](#)

## Release 13.3 (11-09-2025)

### Major Changes

- Previously, BUSYOnline users were not allowed to create backups on Google Drive. With this update, users can now generate backups at their convenience and securely store them on Google Drive, with controlled limits on the number of backups maintained.
- **Changes in flow of License Activation**
  - Fresh New UI
    - A modern and clean interface has been introduced for License Activation, delivering a more intuitive user experience.
  - Easy Flow
    - The activation process has been simplified with minimal clicks, making it faster and more user-friendly.
  - OTP Authentication
    - For License Activation, password-based authentication has been replaced with OTP-based authentication, ensuring improved security and convenience.
  - Auto Download of License File
    - Users no longer need to check their email, download, and save the license file in the BusyWin folder. BUSY now handles these activities automatically in the background, streamlining the activation process.

### Minor Changes

- **Enhanced Validations for Item and Account Master for GST**
  - HSN/SAC codes must be numeric (2–8 digits).
  - Special characters or alphanumeric values are not allowed.
  - Validation of HSN will now always be done from the API during addition and modification of item master.
  - HSN Codes starting from 99 is mapped to tax categories which is tagged under Services and vice-versa too. This ensures proper categorization and compliance.
  - While saving Item Master, a warning will now be displayed if the UQC field is found blank in unit master, which is used in that Item. This prevents incomplete item creation.
  - **Additional validations introduced in Account master**
  - PIN Code must always be 6 digits, with no alphabets or special characters allowed.
  - Station/Location (if e-invoice is enabled) must have a minimum of 3 characters and cannot be blank.
- Previously, while preparing GSTR-1 e-return, users needed to run separate checks for Transactions, HSN Summary, and Document Summary errors. With the new enhancement, the system will automatically validate all these in a single step before e-return generation including validation of HSN Codes used during

the period.

- While validating HSN Online for multiple HSN, a filter for HSN Status (All, Valid, Invalid) has been provided. Invalid entries are shown in red, helping users easily segregate and review valid and invalid HSN codes.
- Profit & Loss report has been optimized.
- In recent updates, the **Data Directory** label was not shown while selecting a company from the list of companies. As per user feedback, it has been reintroduced to make the selection process clearer.
- In the Parameterized Stock Details window, when all parameters were enabled, the complete details were not visible. Vertical and horizontal scroll bars have been added, allowing users to view all parameter details with ease.
- On some machines, in the Query on Item Price report, when the Multiple Price List option was enabled, values under columns like Price (Dozen), Disc., and MRP were not fully visible. This issue has been fixed to ensure all values are displayed clearly without clipping.
- A branch-wise filter has been introduced in the Daily Summary and Daily Balance reports under Account Summary and Inventory Summary Section.
- Minor changes in utility 'Check Incomplete vouchers.
- To make user management easier, the *Superuser* will now be displayed at the top of the user list, ensuring quick visibility.
- New Country 'Benin' has been added in country list while creating company.
- New Country 'New Zeland' has been added in country list while creating company.
- The character limit for RTGS/NEFT reference details in payemnt/receipt voucher has now increased to 25 characters.
- While exchanging data via BDEP, cancelled vouchers will now be automatically excluded from the transfer, ensuring cleaner and more accurate data synchronization.
- While creating a new company by copying an existing company's setup, the e-invoice/e-Way Bill settings and GSP login credentials from the old company were also being copied. This has been corrected so that GSP credentials remain blank for the new company, ensuring security and proper setup.
- New field ITEM\_MAST\_MIN\_SALE\_PRICE has been introduced in Item Barcode Printing.
- While approving masters/vouchers from the Miscellaneous Data Entry section, the user name was not captured in the Detailed Audit Trail report. Now, a provision has been made to record and display the user name for better accountability.
- Label "Allow duplicates of BCN (within the same item and parameter combination)" in Parameter Configuration has been changed for better clarity.
- Inventory Monthly Summary now displays items with the 'Do Not Maintain Stock Balance' flag, showing a zero value in the column of 'Balance Quantity'.

- Now, the system will show a warning message in the Monthly ITC Tagging Report if any status is tagged before the invoice date. This helps users avoid mistakes during tagging.
- While uploading vouchers to **BDEP**, if the Target BDEP ID is invalid or blank in the Party Master, the warning message will display: "**Target BDEP ID is not valid for the party –**". This ensures users can quickly identify the affected party.

### Bugs

- In a few cases, from version 13.2 onwards, after printing an invoice, an extra blank page was also getting printed. This issue has now been fixed.
- In few cases, list of batches was not opening properly at the time of adjustment. Now issue rectified.
- In some cases, the alignment of 'Total B/d' on the second page of the Payment Register was incorrect while printing. The issue has now been resolved.
- While checking the account ledger for multiple financial years, if the user changed the date range using the F2 key and hid some rows using the F9 key, the closing balance was not updating properly. This problem occurred only when the 'Long Narration' option was enabled. Now problem has been resolved.
- If rows were hidden using F9 in ledger reports, the exported Closing Balance in Excel/PDF did not match the on-screen balance. Now problem rectified.
- When users opened the Ageing Payable (FIFO Basis) report, the system was mistakenly showing the Bill Receivable (FIFO Basis) report instead of the correct Bill Payable (FIFO Basis). Now problem rectified.
- In few scenarios, Long Narration for current year vouchers was appearing under previous year entries while viewing Stock Ledger across multiple years. Now resolved.
- When markup or discount is applied to the packaging unit, the caption for the packaging unit was not being displayed in the 'Update Markup/Discount' window. This issue has now been resolved.
- While adding a new item, after entering the item name, the cursor now moves to the 'Print Name' field. In earlier versions, it used to move to the 'Alias' field instead. Now problem rectified.
- While emailing the Sales/Purchase Register, if the voucher number was up to 16 characters long, it was not displayed in full when the 'Show Bifurcation of Amount' option was enabled. Now problem rectified.
- In demo mode, when trying to print an invoice to PDF and the user cancelled the file selection dialog, the process entered into a continuous loop. The problem has now been resolved.
- While viewing the Item Consolidated Summary (Group-wise) with a branch filter, if the report was generated for a specific date range, the Opening Amount was not displayed correctly. Now problem rectified.
- While downloading GST Return RTE 3146 occurring in SQL Mode now resolved.
- While adjusting a challan through F11 in the Sales voucher, if a repeated item was removed, the batch details of that removed item were still appearing in the printed invoice. Problem has been rectified.

- While sharing invoices through BDEP, the "Type of Dealer" and "GSTIN" fields were not getting updated correctly. This issue has now been resolved.
- While regularizing PDC, the 'Select All' option was not working when the 'Retain Voucher Date' setting was enabled. This issue has now been fixed.
- While applying filter on User List a RTE occurred, Now problem rectified.
- This has now been corrected to ensure documents reflect the Super User's credentials.
- Field of <DOC\_PRINTING\_DATE> was not working for Receipt voucher for Nepal Region. Now problem rectified.
- While regularizing PDC, the 'Select All' option was not working when the 'Retain Voucher Date' setting was enabled. This issue has now been fixed.
- In a few cases, while exchanging data through BDEP, a warning message was appearing for item serial number quantity if the quantity was greater than 1. This issue has now been fixed.
- When downloading Receipt/Payment vouchers through the app, if only one voucher had salesman details, those details were being copied to all other vouchers without salesman tagging. This has now been corrected
- When a company created in Busy 17 SQL data was opened in Busy 21, the message 'No Companies Found at Data Server' appeared. This issue has now been resolved.
- In a few cases, multiple filters were not functioning correctly while generating Pending Job Work reports. This issue has now been fixed.
- An issue was observed in the Subledger report where, if it was generated for one general account, blank values appeared in certain cases. The problem has been resolved.

[Back](#)

## Release 13.2 (06-08-2025)

### Major Changes

- BUSY introduces a dedicated solution for Mandi businesses, specifically designed for Commission Agents and Traders operating in Grain (Anaj) Mandis. This industry-specific version offers end-to-end automation, transparency, and compliance, addressing the unique operational needs of Mandi stakeholders.

#### **Key features introduced**

- **Boli (Auction) Entry System**
  - Allows users to enter Auction Purchase transactions.
  - During Auction Sales entry, relevant details are automatically fetched from the linked purchase entry.
- **Item-wise Expense Tagging**
  - Enables tagging and automatic application of expenses during auction/Trading transactions
- **Comprehensive Expense Calculation & Ledger Posting**
  - Automatically handles calculations and ledger postings for expenses such as: Tulai, Jhadai, Dhanka, Labour, Loading/Unloading, Gaushala, and Mandi Tax.
- **Bardana Maintenance**
  - If Bardana is maintained along with the item, Bardana consumption entries are auto-posted.
- **Mandi Tax Exemption**
  - Supports tax exemption configurations based on both the Purchaser & Item.
- **Mandi Specific Reports**
  - Market Fee Report – Summary & Detailed
  - Stock Not Delivered Report
  - Adhatiya (Vendor) Stock Report

### Minor Changes

- In specific operating systems, while sending any invoice/report to WhatsApp, default focus is being set to "Quit" instead of "Send". Now behaviour has been changed.

### Bugs

- While printing invoices in bulk from modules such as Print Utilities, GST Miscellaneous, E-Way Bill Management, or E-Invoice Management, the titles for multiple copies (e.g., Original, Duplicate) were not displaying correctly. This issue did not occur when printing directly from the voucher screen. Now resolved.

[Back](#)

## **Release 13.1 (22-07-2025)**

### **Major Changes**

- Enhancements in GST Module
  - Users can now enter and save their GST Portal credentials (Username & Password) directly in the GST Configuration screen, enabling smoother integration and automated actions.
  - A new provision has been introduced allowing users to automatically download GST Registration Certificate, Orders, and Notices directly from the GST portal, reducing manual effort and improving compliance tracking.
  - GST-related features(Reports/E>Returns/E-way Bill/E-Invoices) will now be available only in Standard/Saffron and higher editions. Users on the Basic/Blue edition will no longer have access to these features.
  - Users can now file their GSTR-1/IFF E-Return directly from BUSY using EVC (Electronic Verification Code), eliminating the need to visit the GST portal separately.
  - Users will no longer be able to generate GST returns using the Government template from BUSY.
- A comprehensive GSTR-1 Dashboard has been introduced, offering a centralized platform to manage all GSTR-1 related tasks:
  - View all GSTR-1 related sections and summaries in one place
  - Upload GSTR-1 data directly to the GST portal
  - Download filed or draft GSTR-1 returns in PDF format
  - File 'Nil Returns' with ease
  - User can reset/delete the GSTR-1 data on portal from Busy itself
  - Reconcile Busy data with portal data to ensure accuracy
- Online GST Activity tracker has been introduced
  - Users can now view the online actions performed via BUSY for any selected return period (e.g., July-2025): like Upload GSTR-1 / IFF, Download GSTR-1,Download GSTR-3B, Download GSTR-2A / 2B. For each action, the system will display the status (e.g., Success or Failure)—allowing users to monitor compliance activities without separately logging in to the GST portal.
- Changes in Mobile App
  - To streamline return handling, the Sales Return voucher has been added to the Mobile App. User can control access through the Mobile App rights configuration.
- Enhancements in the Company Selection Interface
  - The 'Search Company' caption has been removed for a cleaner, more modern layout.
  - For better clarity, the system now displays the total number of companies in the selection list. This was missing in newer screens and is now re-enabled.
- Enhancements in WhatsApp/SMS configuration

- The caption has been updated from "SMS Configuration" to "WhatsApp Configuration" for better clarity and alignment with current usage.
- A default WhatsApp format is now preloaded in newly created companies to enhance the initial user experience.
- If no SMS format exists, the system will now prompt users to create one, ensuring smoother communication setup.
- If the WhatsApp Desktop version is not available on the user's machine, the system will now prompt accordingly to notify the user.
- Enhancement at the time of Company Creation
  - In new company creation, the system will now set the Item-wise Discount type to "Percentage of Amount" by default for more accurate discount application.
  - If the Item Master list is blank, clicking in the list will now prompt the user to add a new Item Master, making the process easier—especially for first-time users.
  - When enabling Batch, Serial No., or Parameter features, the system will now automatically enable Full Allocation of Quantity for Sub-Details, ensuring accurate tracking.
- Users can now install the BUSY Setup directly after downloading it through the 'Check BUSY Updates' option under the Company menu, making the installation process quicker and more convenient.
- A new feature has been introduced that allows administrators to set up login schedules for specific users, giving more control over user access timings.

### Minor Changes

- A warning will now be shown if a cash account with negative balance is selected in the header section of a Payment Voucher (Single Entry mode only).
- While uploading vouchers in bulk to the IRD portal for Nepal, any errors returned by the portal will now be shown with relevant and clear messages, helping users take corrective action more easily.
- While creating a company, the country name "Congo" has now been updated to its full official name: **"Democratic Republic of the Congo."**
- Provision has been made to ensure the event log shows correct and meaningful descriptions for all relevant utilities and settings.
- In addition to Sale and Purchase data, users can now transfer Sales Return and Purchase Return transactions in bulk via BDEP, enhancing data sharing capabilities.
- The default configuration for Letter Text previously allowed up to 40 lines. This limit has now been increased to 60 lines, providing more flexibility for longer communication.
- Now, when a Sales Return voucher is created based on Sales voucher, the Billing and Shipping details will be automatically updated accordingly like item details.
- When creating a company with Pakistan as the selected country, relevant GST masters are now automatically created by default to simplify setup.
- The Salesman List will now display up to 4 address lines instead of the earlier limit of 2, providing more detailed location information.

- Users can now view previous year transactions even if the sub-ledger had a zero closing balance, enabling more comprehensive account reviews.
- Bulk updation of vouchers now supports all ITC eligibility types, whereas earlier it was restricted to only "Input Goods/Services" and "Input Services".
- A new provision has been made to filter data by Voucher Series Group in the "Sale/Purchase Without Order" report, allowing more refined reporting.
- Now provision has been made to show version of **.Net Framework** in System Info.
- In certain cases, when printing multiple copies from the Print Preview, the first page was coming out blank. This issue has now been addressed, and all pages will print correctly.
- Previously, the Date Range and Closing Balance labels were hidden when the side panel was visible. Now, the program auto-adjusts their position upon company login for better readability.
- A new option has been added to allow users to print two invoices consecutively. This can be configured in Page Settings of Invoice format(Configured Only).
- A new provision has been made to display a warning message if an invalid Vehicle Number or Transporter ID is entered while generating the E-Way Bill, helping users avoid submission errors.
- Now, while posting vouchers using the F4 key from the Interest Calculation report with TDS details, TDS references will be automatically created.

### Bugs

- From version 13.0 onwards, the 'Import Voucher from Excel' feature was not working. Now issue rectified.
- In a few cases, Busy was responding slowly while opening the company on both server and client systems in a LAN environment, particularly when the country was set to other than India. Now issue rectified
- RTE 438 was being generated while picking standard narration using F4 in Salary Calculation. Now issue rectified.
- While updating Markup using the 'Update Discount/Markup' button, it was being applied to the alternate unit even when specified to apply on the main unit. Now problem rectified.
- While using Item Body fields in the Inventory Register, the custom column field `<NETT_PRICE>` was displaying values with a negative symbol. Now issue rectified.
- While printing/viewing the Cash Book (Multiple Column) from Busy, some *unexpected values* were being displayed when the "Club Daily Cash/Bank Sale" option was enabled. Now issue rectified.
- In the Salary Calculation voucher, the weekday was not updating when the voucher date was changed. Now issue rectified.
- Type of the dealer was not being displayed while viewing the list of accounts. Now issue rectified.
- In some cases, Trial Balance showed incorrect results for sub-users when the Master Series Group was linked to another user from the same branch. Now Problem rectified.

- In a few instances, an RTE was generated during PDF export of Stock Status Report due to high-resolution images in item masters. Now problem rectified.
- While using filters through F7 or hiding rows via F9 in the Sales Register, the exported CSV did not reflect the grand totals as per the applied filter. Now issue rectified.
- While creating Material Issue/Receipt vouchers with Parameter details for 'Finished Goods to be Received' in the Job Work module, the parameters were not being carried forward properly to the next financial year. Now issue rectified.
- After upgrading data from Busy 21 Release 12.5 to Release 13.0, the Income & Expenditure account was not appearing while printing from the Balance Sheet. This issue has now been resolved.
- In certain cases, 'On Enter' of the previous year balance column in Balance Sheet (Vertical Format) did not match the values shown in the main report. Issue has been resolved.
- If "Upload PDF" was enabled in SMS configuration, the party name was being shown as Cash/Bank in the message while sending WhatsApp/SMS. Now issue rectified.
- Users can now update voucher optional fields for multiple vouchers in one go using the 'Update Voucher Optional Fields' option under Miscellaneous Data Entry.
- In Single User mode, companies undergoing incremental upload through Busy Agent were not appearing temporarily in the company list. This has now been fixed.
- In some cases, report export was not functioning properly on systems with high screen resolution. This issue has now been resolved.
- RTE 9 was being generated while opening the Sales Register (Columnar) when the option 'Show address of parties/accounts in report' was enabled. Now issue rectified.
- RTE-5 was being generated when a sub-user tried to enable transaction rights in Mobile App Configuration. Now issue rectified.
- An RTE 6 (Overflow) error was being generated while auto-creating invoices from challans through bulk updation for opening challan references. Now issue rectified.
- RTE 400 was being generated when an SQL Query was executed multiple times using the shortcut key. Now issue rectified.
- RTE-9 was being generated while checking the return filing status from the Company menu if no company was found in the list. Now issue rectified.

[Back](#)

**Release 13.0 (27-06-2025)**

**Bugs**

- RTE 5 was being generated during bulk updation of inventory vouchers when a format was created but not properly configured. Now issue rectified.
- If a voucher type caption was configured, it was not reflected in the email subject while sending emails; the old caption continued to appear. Now issue rectified.

[Back](#)

## Release 12.9 (25-06-2025)

### Major Changes

- Earlier, reports were displayed in a fixed-size layout which resulted in empty space on larger screens. Now, the report screen automatically adjusts to full screen view for better visibility.

### Minor Changes

- Minor changes have been done in the Item wise Sales analysis Report for Parameterized details.
- Minor changes implemented to improve the process of updating addresses from GSTIN validation in the Billing and Shipping window.
- CTRL+C now intelligently opens BCN-wise report for single-row selection, and copies data when multiple rows are selected.
- Busy now displays a regional settings warning during startup if the system locale is configured to Japanese (Japan).
- Until now, the Branch filter in the Bills Receivable (FIFO Basis) report was only available for All Parties, Group of Parties, or Selected Parties. Now, users can also apply this filter when generating the report for **One Party**.
- The "Sale/Purchase Type Only" filter, which was previously missing in the Regenerate Master Help utility for companies other than India, has now been provided to ensure consistent functionality.
- Minor changes have been made in the behaviour of maintaining 'Report Notes' in the Account Ledger for multiple financial years.
- A new value type called 'Amount Only' is now available to help distinguish absolute amounts from derived values in complex configurable Balance Sheet formats.
- Now, user can view PDC vouchers in which PDC date belongs to next year. It will help user to view those PDC vouchers which is to be regularized in next financial year.

### Bugs

- On Enter details of Sales Analysis with Parameterized details was not working fine in case if we generate the report for a Branch or voucher series group. Now problem rectified.
- While viewing On Enter details in Stock Status (HSN Code-wise), amount was not showing for items with transactions posted without quantity. Now problem rectified.

- In some cases, On Enter details from Balance Sheet to Account Summary displayed an incorrect date range. Issue now resolved.
- RTE 5 occurred while creating Debit/Credit Notes without items in Access database with heavy data volume, especially if HSN was not entered in the account master. Now the issue rectified.
- The filter for One/Group/All Parties was not working correctly while generating the "Material Issue/Receipt Register" report. This issue started from version 12.8. Now rectified.
- Stock Status with packaging details did not calculate quantity correctly according to the item master when 'Item to be shown as: Alias' option was enabled. Issue now resolved.
- When the scheme was applied at the consolidated level and the item was entered using a packaging unit, the system picked the wrong price. Now problem rectified.
- While generating a Material Receipt voucher with type 'Received after Job Work', fully cleared Job IDs were also appearing on clicking 'Load all pending ref', if the original voucher was posted using an alternate unit. Now problem rectified.
- In a few cases, Job ID was not printing in the invoice/document if it belonged to the previous financial year. Now issue rectified.
- Values of Parameter 4 and Parameter 5 were not being carried forward to the next financial year for 'Finished Goods to be Received' in the Job Work module. Now problem rectified.
- In a few cases, Commission Calculation Report was not working correctly where data belonged to multiple financial years. Now problem rectified.
- Provision has now been made for approval of Contact Master. Previously, the approval option existed but was not functional in reports. Now problem rectified.
- While printing the deposit slip, an incorrect message was appearing if the selected date range had no vouchers for the chosen bank account. Now issue rectified.
- During Bank Statement import, copying and pasting from Excel did not capture the full narration, whereas direct import from Excel worked correctly. Now problem rectified.
- A provision has been made to ensure the Bill Sundry heading is displayed properly during bulk updation of vouchers.
- Users were able to maintain Master Notes in Employee Master even when the 'Maintain Employee Notes' option was disabled in Payroll Configuration. Now problem rectified.
- In a few cases, RTE 3421 occurred while generating the 'Query on Item Serial Number' report. Now issue rectified.
- Voucher series was not copied correctly when using F12 to copy vouchers from the previous year to the current year. Now problem rectified.

## Busy

- Compound Discount was not being updated when using the "Update Discount" button during data entry. Now issue rectified.
- Minor changes have been made in the Parameterized Stock Status Report to correctly display closing stock for items where only the option of 'Parameter Details' is enabled and stock is carried forward from the previous year. Now issue rectified.
- In a few cases, RTE 94 occurred while running the 'Check Incomplete Vouchers' utility. Now issue rectified.
- While viewing the Detailed Audit Report for vouchers with E-Invoice data, RTE 3146 occurred due to large character length in the IRN details. Now issue resolved.

[Back](#)

**Release 12.8 (07-06-2025)****Minor Changes**

- Optimization of Balance Sheet for a branch has been implemented.
- Minor changes in Balance Sheet for On-Enter Details for Stock Status.
- Minor changes in 'Select BUSY Model' in company menu.

**Bugs**

- In the BCN-wise Stock Ageing Analysis report, the sale price was being displayed incorrectly in the 'Closing Quantity' column. This occurred when the 'Maintain Sale Price' option was enabled in parameter configuration. Now problem rectified.
- In Profit & Loss – Detailed (Monthly), *On Enter Details* was not working for groups tagged under predefined groups. Now issue rectified.
- Branch-wise On Enter Details was not working correctly in Closing Trial Balance - Alphabetical report for the previous year in some cases. Now problem rectified.
- While viewing On Enter Details in the Salesman-wise Receivable Report, batch-wise details were being shown instead of bill references. Now issue rectified.
- Due Days and Due Date were not being printed in the Salesman-wise Receivable Report. Now issue rectified.
- While sending the Account Sales Register for a single account via SMS, Busy was picking mobile numbers from all vouchers' billing/shipping details instead of the selected account. Now issue rectified.
- RTE 5 occurred during voucher upload to the IRD portal (Nepali Region) in cases where special characters were present in item master. Now problem rectified.
- The reconciliation-related change in Account Ledger introduced in version 12.4 has been rolled back, as clients requested to retain the old balance calculation method for unreconciled entries view.

[Back](#)

**Release 12.7 (03-06-2025)**

**Minor Changes**

- Minor changes have been made in the Multi-column Cash Book to enhance the Master Series Group filter

**Bugs**

- In a few cases, a RTE occurred while modifying the balance in the Account Master after logging in as a Branch user. Now problem rectified.

[Back](#)

## Release 12.6 (28-05-2025)

### Major Changes

- We have revamped Company Creation Journey in Busy by introducing a new UI aligned with New Age Tech. This revamped UI & UX is not only visually appealing but also allows users to create company faster with much fewer steps.
- A new report format, **MSME Form 1**, has been added under the **print options** in the **Outstanding Analysis** section. This helps users generate reports in compliance with MSME reporting requirements more easily.
- Changes in Mobile App
  - Option has been provided in Mobile App Users to Enable E-way bill/E-Invoice creation from Mobile App.
  - Provision of Audit log for E-way bill/E-Invoice has been made in Mobile App.

### Minor Changes

- In a multi-user environment, a provision has now been made to display the latest release on the machine during company login. This will help customers ensure the same release is updated on all client machines.
- New country 'Brundi' added in dropdown list of countries during company creation.
- A warning message will now appear during data entry if the GSTIN in the Account Master is marked as Inactive, helping to avoid errors.
- Ageing Receivables (FIFO basis) report has been optimized.
- Minor changes in F7 key functionality while retrieving last voucher number in data entry.
- A warning will now appear during bulk opening stock updates if multiple Material Centers exist, notifying users that the stock will be updated only to the 'Main Store'.
- The *Access to Mobile App* option has been removed from user configuration, as the old mobile app is no longer in use.
- Mobile App | During data sync, BUSY will now automatically start bulk upload for any pending years—up to two years back or one year ahead.
- Batch-wise Stock Summary Report has been optimized.

- A new report option, "*Print Due Date and Due Days*", has been added in Bills Receivable/Payable. This helps avoid revealing which bills are actually due, allowing for better payment recovery.
- Minor changes have been made to the process of copying company configuration during new company creation.
- New user rights have been added in the user profile for managing the 'Income & Expenditure Account' under Final Results menu.
- Minor adjustments have been made in the System *Information* for better user experience.
- Help menu can now be accessed without logging into a company. Earlier, it was available only after opening a company.
- Balance Sheet annexures can now be filtered by branch for detailed and segmented analysis.
- Minor enhancements have been implemented for better clarity when viewing details in Account Monthly Summary across multiple years.
- Branch wise Balance Sheet and Profit & Loss report has been optimized.

### Bugs

- While filtering by Branch in the Configurable Profit & Loss Account, values of accounts tagged under sub-groups of an account group were not being reflected. Now problem rectified.
- The Account Ledger report for a Group of Accounts was appearing blank when the "MOVED ONLY" option was selected. Now problem rectified.
- In cases where the Sales Voucher list was printed for the previous year only, the total of the Quantity column was not getting printed. Now problem rectified.
- In some cases, opening the 'Bills Receivable (FIFO) Basis' report led to RTE 6 Overflow. This issue has now been rectified.
- Loading the default format (Standard & IFRS) for the Profit & Loss Account from 'Final Results Configuration' was not working when the country was set to Kenya, Ghana, or Nigeria. This issue has been rectified.
- While printing vouchers of the previous year, HSN Code was not printing if it was defined date-wise. Now problem rectified.
- In a few cases, while pasting multiple aliases in the Item Master and deleting some rows, an incorrect message for 'Duplicate Aliases exist' was displayed. Now issue rectified.
- While generating the Day End report, RTE 13 'Type Mismatch' occurred in a few cases. Now problem rectified.
- Master Synchronization was not working for Author Master. Now problem rectified.

## Busy

- While viewing "On Enter" details of Profit & Loss in the Configurable Balance Sheet, RTE 30010 occurred. Now issue rectified. Now problem rectified.
- When printing the Balance Sheet with a specified date range where the end date is not the month-end, and the "Update Balance Sheet Stock" option is enabled, the Stock account was not printed. Now problem rectified.
- While viewing Account Ledger for unreconciled entries, incorrect opening balances were shown in a few cases. Now issue rectified.
- In certain cases, an RTE occurred while modifying vouchers drilled through the Annexure Summary from the Balance Sheet. Now problem rectified.
- Now, Balance Sheet Annexures will display all accounts (both direct and indirect) tagged under Loans (Liability), instead of just the direct accounts as earlier.

## **Release 12.5 (19-05-2025)**

### **Major Changes**

- A new RDP licensing policy has been introduced in the 12.5 release, affecting RDP access management.

### **Minor Changes**

- Minor adjustments have been made to accurately detect the correct hard disk number on systems with multiple drives
- Invoice printing performance has been improved when using challan/order/quotation references belonging to previous financial years.

[Back](#)

## **Release 12.4 (05-05-2025)**

### **Major Changes**

- A new animated splash screen will now appear when opening BUSY, enhancing the visual experience and giving it a more modern look and feel.
- A new MSME Audit Information report has been introduced under Outstanding Analysis, helping users easily access and track MSME-related compliance data.
- Users can now view system-related information directly from both the Company Menu and Help Menu. This feature provides quick access to essential details such as Busy product information, license status, data directory paths, and key system specifications. It helps users and support teams diagnose issues more effectively by offering all relevant information in one place.
- Now, provision has been made to show balances for the past three years in the Vertical format of the Balance Sheet, enabling better financial comparison and analysis.

### **Minor Changes**

- The system now shows Voucher Type in the 'OnEnter' report of Voucher Statistics for better clarity.
- A restriction has been implemented to prevent the reconciled date from being earlier than the voucher date while reconciling bank entries of inventory vouchers.
- In the "Auto Adjust Order References" utility, an option has been introduced to adjust pending orders up to the voucher date.
- Earlier, the side panel did not remain visible. Now, once the user opens the menu, it will be shown based on the company.
- Earlier, the "Check Return Filing Status" option displayed all companies. It will now show only those companies where a GSTIN is available.
- While generating the payment voucher file for HDFC E-Payment, a new report option has been provided to include Bill References for better tracking of payment details.
- The Reconciliation from GST menu has been rearranged for improved clarity and better user experience.

- Minor changes in Bills Receivable report for Multi company results.
- Now, while viewing last transactions during data entry, users can see the MRP along with other voucher details.
- Minor changes in 'OnEnter' details for Stock in Profit & Loss report.
- Previously, all updates in "Apply Data Patch" showed as applied. Now, only relevant patches will display the "Applied Successfully" message for improved clarity.
- Customer was able to add mobile user with same name that is already saved as Busy Sub User. Now, Mobile user can not be created with same name as of Busy Sub User and vice versa.
- If the BDEP password is missing while logging into the company, a clear and proper message will now be displayed to avoid confusion.

### Bugs

- Selecting "Maintain Images/Notes with Masters/Vouchers" for Inventory from the Search Menu led to the Accounts screen instead of the correct Inventory screen. Now problem rectified.
- In certain cases, copying a voucher from Clipboard resulted in an RTE when the source voucher contained six Bill Sundries. This issue occurred exclusively for POS vouchers. Now problem rectified.
- In cases where a voucher had settlement entries, and the settled ledger included bill references, the Adjustment Wizard did not work. Now problem rectified.
- An unnecessary error message was displayed while pressing Enter when "Maintain Detailed Audit Trail" was enabled and frozen. Now problem rectified
- While viewing OnEnter report HSN wise Stock status, quantity out with zero amount was showing in wrong column. Now problem rectified.
- An RTE was occurred when attempting to Print Preview the list of countries. Now problem rectified.
- In cases where a voucher had settlement entries, and the settled ledger included bill references, the Adjustment Wizard did not work. Now problem rectified.
- While saving the voucher, an RTE occurred when no columns were configured under Packing Details. Now problem rectified.
- RTE 52 was encountered during E-Invoice creation in cases where the voucher series name contained the symbol ( " ). Now problem rectified.
- RTE 13 occurred while generating reports using custom columns for double-decker formatted reports. Now problem rectified.
- In few cases, RTE 438 occurred while creating a Salary Calculation voucher. Now problem rectified.
- In the 'Update GST Summary' utility, if 'Escape' key was pressed on the prompt for 'Complete' or 'Partial', the utility opened instead of closing. Now problem rectified.

- In few cases, POS vouchers were getting saved with negative values when absolute discount applied was greater than the item amount. Now problem rectified.
- Sometimes, while performing Bulk Upload on the mobile app from BUSY Desktop (Client-Server Edition), a "multiple users are logged in" message appeared even when only one user was active. Now problem rectified.
- While downloading vouchers from the Mobile App, if the Item/Party name contained an apostrophe ('), an "invalid item/party name" message was shown. Now problem rectified.
- "On Enter Report" for Fund Flow Statement was not working correctly for the month selected from the previous report. Now problem rectified.
- In few cases, SMS/BUSY BNS was not working when sent from Payment/Receipt voucher for Individual Account. Now problem rectified.

[Back](#)

### **Release 12.3 (09-04-2025)**

#### **Minor Changes**

- New menu have been added in Company menu, *Terms of Use* and *Privacy Policy*.
- Minor changes have been done in tagging of Mobile App user.

#### **Bugs**

- While approving Masters/Vouchers from Miscellaneous Data Entry, the User Name was not being captured in the Audit Trail. Now problem rectified.
- Filtering of reports has been refined with minor corrections for better accuracy.
- A negative stock warning for MRP was being displayed in Sales Voucher created "Against Challan". Now problem rectified.
- In a few instances, the Pending Bank Reconciliation Entries did not transfer to the next financial year. Now problem rectified.
- Changes made for the TDS module for Pakistan were incorrectly applied to India as well. Now problem rectified.
- While adding a master using F3 under the Reverse Charge Liability window, an RTE-450 error was generated. Now problem rectified.
- The "Auto Adjust References" Utility failed to create/adjust bill references when accounting vouchers were fed with Tran Type as PDC. Now problem rectified.
- Minor changes have been done for Import voucher from excel.
- When the "Allocate Unique Quantity to Parameters" feature was enabled, the Sales Voucher Against Challan was not being saved. Now problem rectified.

- When printing the Bills Receivable Report using As-It-Is from Grid, the Sr. No. was not printed properly if long narration was included. Now problem rectified.
- While creating format for configurable balance sheet for Schedule III, Totals were not reflecting properly. Now provision has been made.
- In few cases, an RTE occurred while changing the Financial Year in SQL Mode. Now problem rectified.

[Back](#)

### Release 12.2 (11-03-2025)

#### Major Changes

- While validating GSTIN in BUSY for account masters, additional GST-related information is now provided, including E-invoice status, additional addresses, business nature, and return filing status for both the current and previous financial years.
- GST Return Filing Status Check:  
Users can now check the GST return filing status for one or all companies with a single click. Multiple filters are available to streamline the process.
  - Available in Standard and Enterprise Edition.
  - Access via Company >> Check Return Filing Status.
  - This feature is particularly beneficial for CA and Tax Practitioners.

#### Minor Changes

- Improved Fonts for better visibility.
- Import of Item Critical Level now works across all financial years, not just the beginning of the financial year.
- If a message appears regarding the regeneration of the master help file while opening the company, the relevant utility will launch automatically.
- Users cannot create or modify bank formats without including mandatory fields "Voucher Date" and "Short Narration".
- The issue where the date filter was not working while printing Annexures through the Balance Sheet filter has been resolved.
- Event Log Transfer: During data conversion between Access and SQL, event logs will now be transferred.
- Bill references will now adjust automatically on a FIFO basis during the import of bank statements.

- Improved performance when viewing a Account Ledger for 'Group of Accounts'.
- Users can now update Billing/Shipping details for multiple vouchers in one go, similar to the "Update Transport Details" utility. Previously, this was limited to one voucher at a time.
- User rights have been introduced for the Day End report.
- Item details like Batch, Parameter, and Serial No. will now be picked when posting Material Issue/Receipt vouchers with "Challan Reversal" as the transaction type.

### Bugs

- Clearing Orders not related to the branch were appearing during data exchange in the HO-BO model. Now problem rectified.
- While creating Mobile App User, if no user exist and user click on Tab button then RTE was occurred. Now rectified.
- During company creation, the A5 VAT (Half Page) Invoice Format was not properly generated. Now problem rectified.
- In few cases, if masters count is greater than 34000 then RTE occurs while importing masters from XML. Now problem rectified.
- In some cases, the "Cancelled" label was overlapping in cancelled vouchers. Now it has been rectified.
- On converting data from Access to SQL or SQL to Access, pending masters & transactions to be downloaded were not showing in download transaction/masters option in mobile app section. Now problem rectified.
- When printing the Bills Receivable Report using As-It-Is from Grid, the Sr. No. was not printed properly if long narration was included. Now problem rectified.
- The barcode image was not generated while printing a barcode label with second language details. Now problem rectified.
- While upgrading from release 12.0 to 12.1, the IGST tax rate for service-based tax categories was reset to zero. Now problem rectified.
- An RTE-13 (Type Mismatch) error was encountered while exporting the TCS Detail Report to Google Drive. Now problem rectified.
- "E-invoice required" option was getting disabled while opening the voucher in modify mode if the billed party is unregistered and GST report basis is as per billing shipping details. Now problem rectified.
- In case of multi financial year, report notes were not working properly for sales register. Now problem rectified.

[Back](#)

## Release 12.1 (26-02-2025)

### Major Changes

- A new user interface has been introduced, with updated fonts for a smoother view, similar to modern products.
- The shortcut keys panel, which was always visible earlier, will now only appear on the right side when triggered by a button click.
- Mobile App Related Changes:
  - Dedicated Mobile App Section introduced in the Administration Menu.
  - Now, Mobile User can create Masters from the new Mobile App.
  - Now, Payment Voucher can be post through the new Mobile App.
  - Settlement Options provided in the new Mobile App.
  - Mobile User form reframed as per the new Mobile App.
- Reconciliation of GSTR-1, 2A, 2B, 3B, 4A, 8A, IMS has been linked with active BLS.
- Formats for Balance Sheet and Profit & Loss for Schedule III has been provided.
- Profitability reports now available across the financial years.
- Item barcode printing has been linked with BLS.
- Now TDS/TCS report will be linked with BLS.
- Now User will be unable to sign the document if the Digital Signature Certificate has expired.
- While reactivating the license, a "Forgot Password" option has been provided during user authentication. By using this option, the user will receive their password on their registered email ID.
- Changes made in IMS module for GST
  - Provision has been made to show GST return filing date for the invoice in IMS. User has to re-download the GSTR-2A for its impact.
  - Provision has been made to "Exclude Next return period Invoices from IMS" for considering current period invoices only.
  - Now User can view IMS data according to the section like B2B, CDNR.

- New option has been added in IMS "*Ignore Diff. of amount up to \_\_\_* " for reconciling vouchers in more efficient way.

**Minor Changes**

- Voucher Saving optimized with detailed audit trail enabled in the company.
- User will now be able to make changes in BSR code while doing payment of TDS.
- In case of BUSY Online, user can import Bank statement directly through Google Sheet.
- Provision added to Import Bank statements for Bank carrying single column for Debit and Credit.

- Maximum length of Print Name of Account, Item, Contact & Company increased to 60 characters. Will be used in printing of invoice/documents.
- Provision made to apply digital signature (DSC) from BUSY itself. Till now third Party software was required.
- Exporting Ledger in pdf format, option provided to show link of invoice/document/image connected with voucher. If user has chosen the feature of uploading invoice/documents/images on Google drive, link for the same can be shown in Ledger pdf so that the receiver can check the details of invoice/document/image using that link. This feature will be available for some other reports also apart from Ledger.

**Minor Changes**

- Changes in 'Generate Pending Consignment Sales' utility:
  - a. EWay Bill/EInvoice applicability will be set automatically. Till now it was always being set to 'N'.
  - b. Party *Station & PIN Code* will be picked from Party master.
  - c. This utility was working for a single date only. Now provision made for a date range also.
- New reports provided:
  - a. 'Bills Receivable/Payable (FIFO) Basis' (without enabling Bill by Bill feature). Available in Outstanding Analysis section
  - b. 'Unmoved Accounts'. Available in Accounts Summary section.
- 'Multi-company Bills Receivable/Payable', option provided to show Bills Receivable in Bills Payable and vice versa.
- New utility to upload Invoice/Documents in bulk on Google drive. Till now user was able to upload a single Invoice/Document at the time of voucher saving. Now user can upload invoice/documents for existing vouchers to Google drive so that the link of the same can be shared in Ledger.
- Invoice printing configuration, provision made for grouping of Items on the basis of Quantity (+/-). Required to print Items sold & returned back separately.
- While cancelling any voucher, provision made to specify the narration with cancellation which will be saved as voucher narration.
- GSP configuration, till now different GSP credentials were being asked for EWay Bill & EInvoice. Now it has been made common and same credentials will be used for EWay Bill & EInvoice.
- GSP configuration, provision made to validate EWay Bill/EInvoice credentials at the time of configuration. Required to avoid problems arising out of invalid credentials.

- Company GSTIN specified in GST configuration was not being validated during configuration. Now it will be validated.
- GST configuration, option to generate automatic EWay Bill was being asked. Now option for automatic will not be asked and it will be assumed as enabled.
- Material Centre master and option 'Affect Account in Stock Transfer' enabled; in list of accounts to be specified, Stock accounts were also being shown which was creating problem during data entry as direct Debit/Credit to Stock accounts is not allowed. Now Stock account will not be shown.
- Searching Party details, till now voucher belonging to last year could not be viewed by pressing <ENTER>. Now provision made for the same.
- Exporting Party-Item pricing structure configuration, alignment of Item Name & MRP fields was not proper. Now alignment made proper (Item Name left aligned and MRP right aligned).
- Picking of Std. Narration from F4 key during voucher feeding, length of Std. Narration form was small and only 4-5 narrations were visible at a time. Now length increased to show more narrations at a time.
- Sending Alerts through email; email configuration as specified in Alert configuration was not being used. Instead general email configuration was being used. Now separate email configuration will not be asked in Alerts configuration.
- List of Brokers; now Email, Mobile and WhatsApp no. of Brokers will also be shown.
- Account/Item label printing with multiple copies, first one copy of all masters was getting printed and then second and so on. Now all the copies of one master will be printed then all copies of second master and so on.
- Import vouchers from Excel, if some new State was found in Billing Details, same was getting created. Now it will be based on fact if user has State creation rights or not. If not then State will not be created and voucher will not be imported.
- Printing of Amount in Words changed for Saudi Arabia. Now currency string will be printed after amount in words.
- Reports custom columns, new fields provided to show Month & Quarter as per the date of voucher. With the help of these fields user can summarise reports on the basis of Month/Quarter of F.Y.
- Contact Details printing in Ledger and other reports, provision made to print Account Group also (configurable).
- Printing Sales invoice containing Job work references, sometimes printing was very slow. Now speed improved.
- Importing Accounts from Excel, new field <ACC\_BDEP\_ID> provided to import BDEP ID of Account master.

- Carrying parameter-wise stock to next year; same parameter combination with different sales price was getting carried over with a single sales price (first one). Now different sales price within same parameter combination will be carried over with different sales price.
- Banking details in Account master were being asked for selected groups. Now it will be asked for all groups.
- If no company found at specified data path, a message was being shown to create new company. Now one more option to specify a different data path will also be shown along with option to create company.
- Option to show Payment/Receipts details in Sales Register was not showing any details if Bill-by-bill was disabled. Now a label will be shown in Sales register to enable this option if Payment/Receipt details are required.
- 'Indent-wise Statement' report, it was possible to clear pending indent using F4 key which was creating problem if parameters were attached with Indent. Now in this scenario F4 will be restricted.
- While sending email, option 'CC to Broker' was not picking caption from Broker configuration. Now caption will be picked from configuration.
- If only one Voucher Series exist for a voucher type, focus will shift direct to *Date* field during data entry. Has been done to save one <ENTER> key on voucher series.
- Feeding Payment/Receipt voucher, first row D/C will be taken automatically (D for Payment & C for Receipt). It will save one <ENTER> key for user.
- Feeding accounting voucher; on pressing <ENTER> on blank line 1 of narration, second line was being asked. Now it will go to saving directly.
- Viewing Account/Item Ledger or Summary, master can be modified by clicking on label showing master name.
- F9 used in any report where Avg. Price is being shown, till now Avg. Price was getting recalculated wrongly (showing sum of all avg. price in rows). Now in such cases Avg. Price will be disabled as soon as F9 is pressed.
- Exporting Invoice/Reports, export path was always being set as company data folder. Now export data path will be remembered for a user and will be shown by default next time.
- New fields related to Company *PinCode* & *State* and MC *PinCode* & *State* provided in invoice configuration.
- Provision made to show *E-Invoice Ack. No.* in side panel during voucher modification.
- New field <EMP\_REMARKS> provided in columnar Payroll registers.
- Block Master utility, provision made to block for a Group of Accounts.

- Till now data from older version of BUSY could not be upgraded to newer version of BUSY (within same major version like 18, 21 and so on) in demo mode. Now this restriction has been removed.
- 'Item-wise Gross Profit' report, provision made to show Qty. also along with value.
- Check Incomplete Vouchers utility was not checking unapproved vouchers. Now provision made for the same.
- Voucher template tagging utility screen size increased to make it more informative.
- Purchase/Expense vouchers, ITC claimed status (as per ITC Tagging utility) will be shown in voucher modify mode on top left corner.
- Multi Company Bills Receivable/Payable printing, provision made to print report Party-wise.
- Query on Masters, provision made for custom columns.
- Vouchers received for saving through BDEP were being shown in random manner. Now they will be shown in chronological order as they were sent by sender.
- Checking any Purchase invoice status as per GST using F6 key in reports, till now availability in GSTR2A/2B was being shown. Now more details like Voucher Date, Purchase Bill Date and when ITC was claimed will also be shown. Also provision made in a few more reports to show details using F6 key.

  - a. Discount already given will be saved in narration.
  - b. Accounts specified in header will be saved and will be shown by default next time.
  - c. In case of Consignment is enabled, discount will be shown on date range instead of as on date.
  - d. Provision made to adjust Bill References on FIFO basis. Till now references were not being adjusted.
  - e. If *Rounding Off* option was used, an error was being generated. Now rectified.

**Bugs Removed**

- Importing Sales vouchers from XML; in case of large no. of Items and E-Invoice also enabled, an error was being generated during import. Now problem rectified.
- 'Sales w/o Order' report was sometimes generating error. Now problem rectified.
- Purchase voucher with a lot Item Serial Nos.; while printing the same, an error was being generated. Now problem rectified.
- 'Product Planning' report was sometimes misbehaving in case of multiple levels of BOM. Now problem rectified.
- Material Issue voucher with parameters, sometimes wrong parameter-wise pricing was being picked. It was happening when *Purchase Indent* feature was also enabled. Now problem rectified but user will have to resave the *Purchase Indent* vouchers already saved.

[Back](#)

**Release 6.2 (18-08-2022)****Bugs Removed**

- Salary Calculation voucher, *Professional Tax* was not being calculated properly. Now problem rectified.
- Sales Challan enabled; while importing Sales voucher from Excel, an error related to 'Invalid Challan Ref.' was being shown and Sales was not getting imported. Now problem rectified.
- Minor correction in Stock Valuation FIFO basis when some amount is allocated to Items (w/o qty.) through Stock Journal voucher.
- 'Stock Status Detailed', sometimes closing stock value was not correct if stock valuation method was FIFO. Now problem rectified.
- Standard document configuration; button to configure 'Optional Fields/Transport Details Printing' was not being shown for all voucher types except Sales. Now problem rectified.
- 'ITC Tagging Required' option was not working properly for branch users. Now problem rectified.
- 'Ageing Analysis FIFO Basis' was generating error in case of Nepal country. Now problem rectified.
- 'Batch-wise Profitability' was sometimes generating error. Now problem rectified.

[Back](#)

**Release 6.1 (28-07-2022)****Minor Changes**

- Sales data entry and reading of Items from barcode enabled, provision was there to pick Item manually with the help of F4 key. This F4 key was working on all columns (Qty., Price, Amount etc.) creating confusion. Now F4 key will be applicable on Item column only.

**Bugs Removed**

- 'Vendor-wise Parameter' report was generating error during drill down. Now problem rectified.
- Account Ledger with option 'Show Full Voucher Details' was generating error. Now problem rectified.
- Voucher Series configuration; on clicking option 'Send Email after Saving', configuration for SMS sending was being shown instead of Email sending. Now problem rectified.
- Clicking **Help**→**User Manual** was showing user manual for BUSY 18 instead of BUSY 21. Now problem rectified.
- Changing voucher type from *Sales Return* to *Purchase* sometimes an error was being generated related to 'Org. Sales Details'. Now problem rectified.
- Balance Sheet; while drilling down 'Diff. in Op. Bal.', Op. Bal. of *End Date* was being shown instead of *Start Date*. Now problem rectified.

[Back](#)

**Release 6.0 (18-07-2022)****Major Changes**

- E-Way Bill/E-Invoice generation, provision made for one more GSP (Pinnacle Finserve) to take care of load balancing and emergencies. User need to register for both the GSPs (Webtel & Pinnacle) at NIC portal and specify both the credentials in GST configuration. BUSY will automatically decide which GSP is to be used for generation of E-Way Bill & E-Invoice.
- Provision made to upload BUSY generated documents like Invoice/Receipts/Dr Notes/Cr Notes etc. on Google drive. Will be used in future where user can access these documents and share with Parties without using BUSY. Can be configured through **Features/Options→Accounts / Inventory→Maintain Notes & Images with Masters/Vouchers**.

**Minor Changes**

- BUSY registration & Company creation, new fields will be asked:
  - a. Company GSTIN, PAN & CIN.
  - b. Accountant Name, Email & Phone.
  - c. CA Name, Email & Phone.
  - d. Industry Type & Nature of Work.
- Changes in Multi Company results:
  - a. Company short name will be shown instead of full name to manage column space.
  - b. Some of the reports removed as they were not required.
  - c. Some minor refinements in Stock Status & Trial Balance.
- Dr/Cr Note & GST Expense feeding:
  - a. No. of rows for GST entries increased from 64 to 128.
  - b. Provision made to input Address of Party in Dr/Cr Note when we choose option 'As Specified Below' and E-invoicing is also enabled.
- Bull Sundry master, provision made to calculate Bill Sundry value on clubbed value of multiple existing Bill Sundries. Till now value could be calculated on a single existing Bill Sundry only.
- While making TDS payment, provision made to show references for Domestic Company & other than Domestic Company separately as the payment for above two are to be made separately. Also provision made to exclude current month references as payment is normally made for last month references and current month references are not required to be shown in grid.
- New option 'Enable ITC Tagging' provided in GST configuration. If enabled, only then ITC tagging related options will be shown otherwise not. Till now ITC tagging was always enabled.
- Purchase voucher tagged through ITC tagging utility (ITC claimed), a warning will be shown while modifying/deleting that voucher.

- Provision made to specify 'Default HSN Code' in GST configuration. Will be picked while creating new Item.
- HO/BO configuration matching, POS settlement configuration was not being matched and no warning was being shown for any mismatch which was creating problem later on. Now it will be matched and warning will be shown for any mismatch.
- FTP backup option has been removed as it is no longer being used. User can use option of Google Drive backup through BusyAgent.
- Bill Reference management window; if amount adjusted was more than amount available in reference being adjusted, no warning was being shown. Now a warning was being shown in this scenario.
- Purchase Type master, option to specify as 'Capital Purchase' was not available for Nepal & Oman. Now enabled for these two countries as required in their VAT reports.
- Country OMAN, while feeding Import Purchase voucher, 'Assessable Value' will be asked as required in VAT reports.
- Salary TDS calculation, new section 80CCD (1B) added in chapter VI A for NPS subscribers.
- Speed of Stock Status detailed was slow if option 'Show Value of Items' was set to 'Y'. Now speed improved.
- Creating default Order/Challan references for an Item being used multiple times in a voucher, till now pattern was *Item Name/1, Item Name/2...Item Name/11* which was creating confusion in alphabetical sorting. Now pattern will be like *Item Name/001, Item Name/002...Item Name/011* and so on.
- Invoice designing, size of <EINVOICE\_QRCODE> was fixed to 1.25 Inch. Now provision made to specify the size of QR Code. For example tag <EINVOICE\_QRCODE,#'QRC:2.5',L> will print QR Code in 2.5 inch.
- While sending bulk email to multiple Parties, mail was being sent to deactivated Parties also. Now mail will not be sent to deactivated Parties.
- User dashboard; in date-wise Sale/Purchase listing, value was being shown inclusive of tax (total invoice value) whereas in summary, tax exclusive value was being shown. Now tax exclusive value will be shown everywhere.
- Sales/Purchase Register; if option 'Show Bifurcation of Amt.' is enabled, Sales/Purchase Amt. as posted in accounts and tax amount was being shown. Now 'Taxable Amt.' will also be shown as sometimes Sales/Purchase Amt. & Taxable Amt. are different.
- Dr/Cr Note & Payment Register, option provided to 'Show Bifurcation of Amt.' to show Taxable Amt. & Tax Amt. separately.
- Country Ghana, multiple surcharge/cess have been introduced which need to be applied before applying VAT. Same could be implemented using different Bill sundries but it was not possible to apply these taxes

in in tax inclusive transactions. Now in this scenario where user has tax inclusive price only, a button has been provided in Sales voucher to split price of Item assuming it is tax inclusive and breaking it to before tax price so that user can apply taxes through Bill Sundries.

- Account Registers; label 'Total Tax. Amt.' was not considering *Cess* amount. Now it will be considered.
- Items Issuable/Receivable report was running slow. Now speed improved.
- BCN-wise Profitability report, provision made to calculate profit % on the basis of either *Cost Price* or *Sales Price*. Till now it was always being calculated on Cost Price.
- Text based Global Query, provision made to search in multiple F.Y. Till now it was available for current F.Y. only.
- Minor refinement in 'E-Way Bill Generated by Self' utility.
- Salary Calculation voucher grid; while scrolling to right side, Employee Name was getting invisible. Now Employee Name column will be frozen during scrolling.
- 'End of List' feature enabled for Item master, same was not working while specifying Items in in BOM master. Now it will work.
- Import Sales/Purchase vouchers from Excel, <ORDER\_REF\_NO> field in Sales/Purchase was not getting adjusted against Order No. as specified in Excel sheet. Now it will be adjusted.
- Payment Reminders, pending amount was being shown as 'Rs. - xxxxx.xx'. Here '-' was giving impression of negative value. Now '-' has been removed and pending amount will be shown as 'Rs. xxxxx.xx'.
- PDC Voucher with PDC date belonging to next year, *New Ref.* was not allowed but user was able to do so in voucher modify mode which was creating problem later on. Now in modify mode also *New Ref.* will not be allowed.
- Receipt / Payment Advice designing, new fields <VCH\_CREATION\_DATE> & <VCH\_CREATION\_TIME> provided.
- While importing masters from Excel, sometimes some unprintable characters were getting imported in master name which was creating problem later on. Now in such scenario data will not be imported and a message for presence of junk characters will be shown.
- Payment Reminder/Statement of A/c; provision made to print QR Codes (configurable).
- Sales/Purchase Invoice against Challan, user was able to save the same with zero qty. Items creating problem in Challan reference adjustment. Now zero qty. Items will not be allowed in 'Against Challan' type of transactions.
- Event Notification; provision made to show notification for Voucher/Master Approval/Rejection.

- Multiple Purchases of same BCN with different Sales price; at the time of Sales, price of BCN was being picked from first Purchase. Now price will be picked from last Purchase.
- Horizontal Balance Sheet, options 'Show Group & Amount in Separate Columns' & 'Show Second Level Details' will be set to 'Y' by default. Till now these options were set to 'N' by default. Has been done to make Balance Sheet more presentable.
- Statement of A/c printing; ledger accounts involved in transactions were not being printed. Instead only transaction type was being printed (Sales, Purchase, Receipt etc.). Now a new option provided 'Print Account as per Ledger?'. If enabled, ledger account(s) used in transactions will also be printed (like Account Ledger).
- Printing Account Ledger; in case closing balance was in crores, there was not space left between credit value and closing balance. Now spacing improved.
- Changes in Bulk Payment utility:
  - a. Till now option was available to give discount during Payment but if the discount was already given at the time of Purchase that was not known. Now discount given in Purchase will be shown along with other Purchase details.
  - b. While creating Payment vouchers, option provided to create separate voucher for each Bill reference being adjusted.
- Changes in Bulk Invoice from Order/Challan utility:
  - a. Date-wise Item price was not being picked. Now it will be picked.
  - b. 'E-Invoice Required' was always being set to 'N'. Now it will be set to 'N' or 'Y' as per the eligibility of E-Invoice in invoice being generated.

### Bugs Removed

- Free Qty. enabled; while using 'Auto generate Invoice from Orders' utility, sometimes free qty. of one voucher was getting added to another voucher. Now problem rectified.
- Bulk Updation of Inventory vouchers; in case of Nepali Date, field <VCH/Bill\_DATE (NEPALI)> was generating error. Now problem rectified.
- Parameter-wise stock enabled but BCN option disabled in main configuration, still option for BCN was being asked in Item master. Now problem rectified.
- Trying to open calculator by pressing <F10> without opening any company was generating error. Now problem rectified.
- Party Dashboard->Party Summary was being shown blank if option 'Save images in database' was enabled for Party. Now problem rectified.

- Bulk Updation of Items; in case of branch user, master series tagged with Item was getting deleted and price as specified in grid was not getting updated back in Item master. Now problem rectified.
- Bills Receivable/Payable report printed from screen report and option 'Sort Party-wise' enabled, Parties with no pending bills were also getting printed. Now problem rectified.
- Sales Analysis report printed through sub user and only *Sales Return* data being printed, an error 'You don't have rights to print this report' was being shown even if user had rights for same. Now problem rectified.
- While printing Item Batch-wise details in 'Invoice against Challan', sometimes wrong batch details were being printed. Now problem rectified.
- Item's Reorder Level set MC-wise; related Triggers were not working properly. Now problem rectified.
- Discount specified at BCN level in Purchase voucher was getting being picked in Sales voucher during direct BCN scanning. Now problem rectified.
- Auto Adjustment of References utility:
  - a. If PDC voucher references were adjusted, same were not being reflected properly in Bills Receivable/Payable reports. Now problem rectified.
  - b. If more than one account was used in voucher, references for only first account was being adjusted and other accounts were left as it is. Now problem rectified.
- User Activity Log enabled, an error was being generated while modifying any TDS Category master. Now problem rectified.
- Item's Unit changed in Item master; same was not getting reflected in BOM & Scheme masters. Now problem rectified.
- Voucher Audit enabled and option 'Show Audit Details in Vouchers' disabled, even then Audit Details were being shown in voucher. Now problem rectified.
- Balance Sheet generated for a date range and start date other than the beginning F.Y. date; sometimes during drill down, wrong value of Op. Stock. Was being shown. Now problem rectified.
- Data export in XML format, 'E-Invoice Ack. Date' was getting disturbed and not getting imported properly in target data. Now problem rectified.
- Salesman-wise Receivable/Payable report, sometimes salesman not having any outstanding were also being shown. Now problem rectified.
- Depreciation Chart Company Act, totals were not proper. Now problem rectified.
- On Account Parameter-wise report was misbehaving if some Job Entries with Parameter details were also found. Now problem rectified.

- 'Parameter-wise closing stock balance only' report was always showing Op. Stock as zero whereas same was being shown correctly in detailed report. Now problem rectified.
- Item Details printing in reports, wrong value of Item Discount was being shown. Now problem rectified.
- PDC vouchers regularized using *Misc. Data Entry* utility, 'Instrument details' were not getting updated in voucher. Now problem rectified.
- On summarising 'Order-wise Statement' report on *Voucher No.*, report was getting disturbed. Now problem rectified.
- Vendor Parameter-wise Stock report was showing mismatch in Closing Qty. as Sales Return vouchers were not getting included. Now problem rectified.
- Short Narration specified for any account in *Settlement Details* was getting repeated for all accounts in Bank Reconciliation. Now problem rectified.
- 'Validate Sales Return with Sales' feature was not working properly if original Sales voucher belonged to last F.Y. Now problem rectified.
- Separate Billing Details form; while searching a Party from Mobile No. and *FSSAI No.* also enabled, an error was being generated. Now problem rectified.
- Employee Master; sometimes an error was being generated while specifying Salary Structure. Now problem rectified.
- An error was being generated while trying to send SMS by phone. Now problem rectified.
- Discount/Markup Structure, even if separate posting was disabled, 'Account to be Posted' field was showing last saved account, creating confusion in voucher posting. Now problem rectified.
- QR Code generated by BUSY was sometimes not getting recognised by some of the Payment Apps like *PhonePe*. Now problem rectified.
- Job work references carried from last year; while adjusting them in current year, Job ID date was being shown as blank. Now problem rectified.
- Pressing ALT+F6 on Account Ledger to create new Receipt voucher, option for 'ITC Tagging' was being shown first (which is invoked by F6) and then option for Receipt voucher was being shown. Now problem rectified and ALT+F6 will create Receipt voucher only.
- Importing vouchers through BDEP, Party as specified in source voucher was getting changed automatically (as per source BDEP id) but the Billing Details as specified in source voucher were not getting changed. Now problem rectified.
- Schemes were not working properly if features 'MRP-wise Stock' & 'Treat MRP as Sales price' were both enabled. Now problem rectified.

- Sales Invoice; picking data from last year's Orders using F11, if Order was in multi- currency and Item-wise discount was also applied, Item's price was not being picked properly. Now problem rectified.
- While printing Balance Sheet in vertical format, second level details were not being printed if Beg. F.Y. was other than 01 Apr. Now problem rectified.
- Printing Balance Sheet, totals of Job Work accounts was not being printed. Now problem rectified.
- <ITEM\_DESCRIPTION> field used as custom column in Order-Wise Statement was not showing any value. Now problem rectified.
- Cash Flow Statement, on <ENTER> was generating error. Now problem rectified.
- Event Notification configuration, if two nos. were specified to receive notification then notification was being sent to second no. only. Now problem rectified.
- BNS configuration at voucher series level and notification enabled for both Self and Party; notification was not being sent to Party. Now problem rectified.
- While upgrading a company from any version prior to BUSY 21 (5.0), in POS voucher series configuration default date was getting set to 'System Date' from 'Last Voucher Date'. Now problem rectified.
- Pending Job Items report, Alt. Qty. was not being shown in case report was generated for *Both Units*. Now problem rectified.
- Cash/Bank book with option 'Show Single Line for Sales/Purchase' enabled; if two accounts were specified in an accounting voucher, same was not being reflected properly in Cash/Bank book. Now problem rectified.
- Invoice printing where Qty. not being printed but 'Print Totals of Qty.' option enabled, totals section in printing was getting disturbed. Now problem rectified.
- List of Employees for all Employees, custom columns were not working. Now problem rectified.
- <BILL\_REF\_AMT> field used as custom column in list of accounting vouchers was showing wrong value. Now problem rectified.
- Sending SMS for Payment Advice for voucher having multiple Parties and choosing option to send Advice to 'Individual Parties', in SMS message incorrect amount was being shown. Now problem rectified.
- Vendor-wise Stock was sometimes generating error if any custom columns were used. Now problem rectified.
- Creation of State/Country Master was connected with *Misc. Masters* user rights but user not having rights on *Misc. Masters* was able to create the same using F3 key in other master creation (Party master). Now problem rectified.

- Botswana Customer Statement report was generating error. Now problem rectified.
  - Inventory Day Book filtered for a branch was generating error. Now problem rectified.
  - Account master, if group was specified 'Direct Expense' and option 'Allocate Amount to Items' also enabled and then group changed to some other group, value of 'Allocate Amt. to Items' was getting set to 'Y' only. Now problem rectified.
  - Sending WhatsApp messages to a group of Parties through *Bulk SMS* utility, messages were not being sent. Now problem rectified.
  - Importing Journal vouchers from Excel in multi-currency and in single entry mode, vouchers were not getting imported successfully. Now problem rectified.
  - Invoice printing with option of grouping of Items enabled, in case of multi rate vouchers incorrect tax amount was being printed. Now problem rectified.
  - HO/BO data sync enabled but option to update branch Item's Op. Bal. during sync disabled, even then Op. Bal. in branch was getting update as per HO during data sync. Now problem rectified.
  - HO/BO data sync; while checking error log after data sync at HO, an error was being generated. Now problem rectified.
  - Parameterised Maximum Level report was sometimes not showing maximum level for a few Items. Now problem rectified.
  - Voucher Approval enabled; during parameterised stock data entry, closing stock label in bottom was considering stock of unapproved vouchers. Now problem rectified.
  - POS data entry:
    - a. If both Settlement Details & Separate Billing Details were enabled then sometimes an error was being generated during data entry. Now problem rectified.
    - b. If only Markup was enabled and Discount not enabled, List price of Item was not being picked. Now problem rectified.
- While picking Challans for 'Challan Reversal' type of transactions, sometimes an error 'Invalid Type' was being shown. Now problem rectified.

[Back](#)

**Release 5.3 (14-04-2022)****Minor Changes**

- Payment Reminder letters, new option 'Due/Clearing Days Basis' provided as available in Bills Receivable/Payable reports.
- While showing Bills Receivable/Payable reports through on <ENTER> of some other report, option 'Due/Clearing Date Basis' was not being picked as its last saved value. Now last saved value of this option will be picked.
- Bank Reconciliation report was showing 'Actual Bank Balance' in a label which slowed down the report. Now this label has been removed.

**Bugs Removed**

- Picking data from pending Orders from last year using F11, sometimes Broker as specified in last year's Orders was not getting picked. Now problem rectified.
- Sending Payment Reminders by email, option 'Send to Individual Party' was not being shown. This problem started with ver. 5.2 only. Now problem rectified.
- POS data entry; 'Discount Grand Total' label was not showing correct value if 'Sales Return in Sales' was allowed. Now problem rectified.
- Emailing GST Summary from screen report; while closing company an error 'Some forms are open' was being shown. Now problem rectified.
- Call Receipt voucher, option to print the same at the time of saving was not being shown in case of sub user. Now problem rectified.
- Stock Journal created through Physical Stock voucher and stock Valuation being FIFO, sometimes incorrect value of Items being consumed was being picked. Now problem rectified.
- Voucher splitting was not impacting the Cash Flow report. Now problem rectified.
- Transport Details form, 'Dispatch From' address line 3 & 4 were not getting saved properly creating problem in E-Way Bill / E-Invoice generation. Now problem rectified.
- Auto Adjustment Bill Reference utility was not working properly in case settlement was enabled and full amount was settled. Now problem rectified.
- While working on a shared server, sometimes an error was being shown after starting BUSY. Now problem rectified.

## Busy

- TDS applied through a non-impact Bill Sundry, sometimes TDS reference was being created for main Party instead of Party specified in Bill Sundry. Now problem rectified.
- Account Group Summary – Vertical report; on <ENTER> report was not getting filtered on chosen Account Group. Now problem rectified.

[Back](#)

**Release 5.2 (31-03-2022)****Minor Changes**

- Speed of picking pending consignment details during data entry was slow. Now speed improved.
- Minor changes in 'Bulk Payment/Receipt' utility:
  - a. Till now 'Short Narration' was always being posted in 'Instrument Details' if same was enabled. Now it has been made optional.
  - b. While loading all the Parties, default amount was getting preloaded as per Bills Payable/Receivable or Ledger Balance. Now a button provided to clear all values in amount column so that user can specify the amount himself.

**Bugs Removed**

- Modifying Unit Master, an error was being generated if 'User Activity Log' was enabled. Now problem rectified.
- Date separator set to '.'; Bills Receivable/Payable report printing in slip format was showing first two characters of year instead of last two. Now problem rectified.
- While sending email, last CC Email was not being remembered even if same was configured in email configuration. Now problem rectified.
- Sales data entry; while picking Item details from BOM using <ALT+F4> key, sometimes data entry form was getting closed. Now problem rectified.
- Sending bulk email of Sales Invoice through 'Print Utilities', sometimes an error was being generated. Now problem rectified.
- Stock Journal voucher; while adjusting MRP-wise stock, an error was being generated. Now problem rectified.
- If security file for data path was specified in command line, an irrelevant popup message was being shown while starting BUSY. Now problem rectified.
- List of Stock Transfer vouchers was generating error if options 'Show MRP' and 'Show Report Notes' both was enabled. Now problem rectified.
- 'Vendor-wise BCN Stock' was sometimes generating error. Now problem rectified.
- 'Rewrite Book's' was generating error if Item batch-wise reporting was enabled. Now problem rectified.
- User disabled to create new F.Y., in some cases he was able to do so. Now problem rectified.

[Back](#)

**Release 5.1 (22-03-2022)****Minor Changes**

- Until Ver. 5.0, Item MRP-wise stock management did not have any warning for negative stock. Starting from Ver. 5.0 this option was introduced and default choice was set to 'Don't Allow' creating confusion for users of earlier versions. Now default choice will be set to 'Allow' so that backward compatibility will be maintained.
- HO/BO sync enabled; Item created in BO and synched to HO, price of Item as specified in BO was being set as branch price in HO but not as regular price and regular price was being left as zero. Now branch price will be set as regular price also in HO.

**Bugs Removed**

- 'Production Planning' report; if option 'Consider Multiple Level BOM' was enabled, wrong *Raw Material* deficiency was being shown. Now problem rectified.
- Item's Multiple Alias was getting erased while using feature 'Update Sales Price from Purchase Price'. Now problem rectified.
- Starting from Ver. 5.0, while clearing any entry in *Bank Reconciliation*, a lot of time was being taken in saving the reconciled entry. Now problem rectified.
- Purchase Register; if options 'Show Unapproved Entries' and 'Show Bifurcation of Amount' both were enabled, an error was being generated. Now problem rectified.
- Sales Register generated for *Selected Parties* was generating error. Now problem rectified.
- 'Cost Centre Ledger' email was not being sent. Now problem rectified.
- 'Auto Generate Production Vouchers' utility was not taking correct price of Raw Material in case of FIFO stock valuation method. Now problem rectified.
- 'Stock Ageing on FIFO Basis' for a branch in SQL mode was generating error. Now problem rectified.
- 'Item at MC Level' enabled, warning for negative MRP-wise stock was being shown even if stock was available. Now problem rectified.
- Nepal 'Materialised View' report for a Voucher Series Group was generating error. Now problem rectified.

[Back](#)

## Release 5.0 (10-03-2022)

### Major Changes

- New feature 'Event Notification' introduced. By enabling this feature user can get notifications of specific events like User Login/Logout, Master Add/Modify/Delete & Voucher Add/Modify/Delete, on his mobile through BusyBNS App. Can be enabled through **Features/Options**→**General** Tab.
- Provision made to save Master/Voucher images in user's Google Drive or to specify link of image already saved in Google Drive. Till now Master/Voucher images could only be saved in database in SQL mode. To enable this feature follow below steps:
  - a. Use option 'Enable Connectivity with Google Drive' through **Features/Options**→**General** Tab.
  - b. Once above option is enabled follow the process of Authentication with Google Drive.
  - c. Then enable option of saving of images in Google Drive in specific sections (Maintain Images & Notes) in **Features/Options**→**Accounts/Inventory** tabs.
  - d. Once configured, BUSY will prompt either to save the image in Google Drive or to specify link of already saved image in Google Drive after Master/Voucher saving.
- Provision made to export any screen report to Google Worksheet like Microsoft Excel. To enable follow the below steps:
  - a. Use option 'Enable Connectivity with Google Drive' through **Features/Options**→**General** Tab.
  - b. Once above option is enabled follow the process of Authentication with Google Drive.
  - c. Now while exporting any screen report; in the list of *Data Format* options 'Google Sheet' will also be shown as one of the options.
- Provision made for E-Invoice QR Code printing for country Saudi Arabia:
  - a. Enable in **Features/Options**→**GST/VAT** configuration.
  - b. Enable in respective voucher series.
  - c. Enable QR Code printing in Standard Invoice printing configuration.
  - d. Once enabled, E-Invoice QR Code will start printing in invoices.

### Minor Changes

- Till now backup of data files more than 2GB could not be compressed and was getting backed up as it is taking more space. Now this restriction has been removed and data more than 2GB will also be compressed. Also the compression mode till now was proprietary but now changed to *zip* format. Since the compression mode has been changed, data backup made from BUSY21 (5.0) onward will not be restored in lower versions.
- Sending invoice *pdf* by BNS/SMS, format of accompanying text message was fixed. Now provision made to make that text message configurable. If any invoice format with the name *BusyBNS* or *BusySMS* is found then that format will be used to generate text message accompanying invoice *pdf* being sent by BNS/SMS.

- User rights provided to *Generate/Print E-Way Bill* and *Generate/Print E-Invoice*. Till now these options were available to all users.
- E-Way Bill/E-Invoice configuration in **Features/Options**→**GST** tab, provision made to disallow sub user to delete/modify invoice once E-Way Bill/E-Invoice has been generated. Till now invoice with E-Way Bill/E-Invoice could be deleted/modified by sub user.
- Bill-by-bill details window for new reference, provision made to create multiple new references (against one) on the basis days as specified. Required when payment against a bill is to be received in multiple parts (like EMI).
- Provision made to print second language data in Item bar code printing utility.
- Provision made to apply Schemes in *Stock Transfer* voucher also. Till now schemes were available in Sales/Purchase/Sales Return/Purchase Return vouchers only.
- Feeding *Dr Note/Cr Note (w/o Items)*, provision made to pick Party GST details as per Party specified in voucher or as specified there (parallel to Separate Billing/Shipping details in Sales voucher).
- Feeding *B2B Expense* voucher, if any Expense account was not found then voucher was not being accepted. This treatment was creating problem while using Expenses Payable account instead of Expense account. Now this restriction of having Expense account has been removed and user can feed *B2B Expense* voucher with any account.
- Till now feeding *B2B Expense* voucher with a Composition Party was allowed creating confusion later on. Now a warning will be shown in such cases so that user can take the corrective action.
- Specifying Account/Item details in second language, length of Name/Alias/Print Name increased from 40 to 60.
- *Currency String* field size was 10 characters. Now increased to 15 characters as required in country Ghana.
- For country Ghana, *Amount in Words* was to be specified in different format. Now provision made for the same.
- Payment Reminder/Statement of A/c; from second page onward, Party name was not being printed on top of page. Now it will be printed.
- Bulk Updation of Accounts/Items; if <ESC> was pressed, screen was getting unloaded without any warning resulting into loss of any work done. Now on pressing <ESC> user would be prompted whether to quit or not.
- Provision made to 'Print Instrument Details' in *Statement of A/c*.
- Bills Receivable/Payable & Bill-wise Statement, provision made to calculated *Due Days* on the basis of either Voucher Date/Due Date.

- Bill-wise Statement, provision made to show either *Pending Days* or *Clearing Days*. Till now *Clearing Days* was being shown
- Broker-wise Bills Receivable report, provision made to 'Sort Party-wise'. Till now all pending bills were being sorted Voucher No./Date-wise.
- Ageing Analysis; while mailing report for all Parties till now report could be sent to one email ID only. Now provision made to send mail to individual Party like in other reports.
- Sending bulk email of any report to individual Party, provision made to *Send to Party* and/or *Send to Self*. Required when Party-wise report is required to be sent on our own email also. Till now individual mail could be sent to Parties only.
- Making TDS payment entry, *Quarter* was being asked after selecting the references and user had to pick manually all the references for the current *Quarter*. Now *Quarter* will be asked before picking references and pending references on the basis of selected *Quarter* will be picked automatically.
- Account master creation; on pressing F4 on *Station* or *Transport* field, option to create master by specifying GSTIN was being shown. Now in this case list of *Transports* or *Station* will be shown to pick from.
- Voucher splitting has been restricted in case Compound Discount/Markup has been applied with Items as it was creating confusion in split values.
- User Dashboard configuration, provision made to show Bills Payable in Bills Receivable and vice versa.
- Speed of showing List of Companies with */ccd* command improved.
- Item master field *HSN Code* was being shown in country *Ghana* and *Gambia* which was not required. Now it will not be shown.
- Account Ledger on screen; provision made to show status of a Purchase Invoice as per GSTR-2A/2B with the help of F6 key (like in Bills Payable report).
- *Cheque Printing* utility provision made to show Total Amount of cheques being printed.
- Screen reports; if both Sorting & Filtering was applied on a report, printing directly from grid was not allowed. Now if any sub details (like Narration, Item Details) are used in report only then printing directly from grid will be restricted in this scenario.
- Applying Compound Markup in Sales invoice, value more than 100 was not being accepted. Now it will be accepted.
- Warning for *Overdue Pending Bills* in Sales Invoice, now *Overdue Days* will also be shown.

- Item barcode printing with Item MRP based on Item's Price Category; if some numeric value was specified in Price Category field, Item's MRP was being printed as zero. Now in such scenario MRP as specified in Item Master will be printed.
- Slight change in Balance Sheet *Horizontal* format columns spacing to make it more readable.
- 'Auto Create Bill References' utility was picking *Voucher No.* as *Ref. No.* for Purchase Invoices. Now *Purchase Bill No.* will be used as *Ref. No.* instead of *Voucher No.*
- While showing report notes on screen, F.Y. in which note was created will also be shown along with date of note creation.
- Pending Job Work reports; provision made to generate for *Selected Parties* and *Selected Items* also.
- Exporting any report to Excel; in text columns, ' ' was being appended in the beginning of column value creating confusion. Now it has been removed and data will be exported as it is.
- Purchase Type master, option to specify *Capital Purchase* was not available for country Nepal. Now made available.
- Creating new company; for some states a default declaration was being shown in Invoice Standard format. This declaration was required in VAT regime and not in GST. Now it will not be shown by default in case of GST.
- Specifying Item's *Multiple Alias* during Item creation, option 'Read from Barcode' was always being shown as disabled and user had to enable it to use this option. Now user's choice (enabled or disabled) will be saved in background and will be shown as enabled or disabled next time when this form will be shown.
- Billing/Shipping Details window; while picking details from Party master using F4 key, *Party Name* was being picked. Now *Party Print Name* will be picked.
- Option to copy Voucher while saving from Sale to Purchase and vice versa has been extended to Sales Return to Purchase Return and vice versa.
- While copying voucher from Sales to Purchase, by default 'ITC Eligibility' was being shown as *None*. Now it will be shown as *Input Goods*.
- While going through Trial Balance to Account Ledger, *Narration* was not being shown in Ledger. Now it will be shown if option 'Show Narration' was enabled earlier while viewing Account Ledger independently.
- Billing/Shipping Details enabled; while sending Email/SMS to Party after voucher saving, same was being sent to Email/Mobile specified in Billing/Shipping Details window instead of as specified in Party master. Now it will be sent to both (as specified in Billing/Shipping Details and as specified in Party master).
- Item's *Multiple Alias* size was 20 characters. Now increased to 40 characters.

- Warning for *Minimum Sales Price* was being shown in Sales & Sales Order vouchers. Now provision made to show in Sales Quotation & Sales Challan also.
- While replicating vouchers, *Due Date* in Bill references was not getting set as per due days specified in Account master. Now *Due Date* for replicated voucher will be set as per due days specified in Account master.
- <ALT+F4> key was closing data entry screen abruptly without any warning. Now <ALT+F4> key has been disabled in Masters/Vouchers.
- Sales data entry with barcode scanning enabled; on pressing F4, List of Items was being shown whereas in case of barcode scanning disabled option to pick data either from *Item Group* or *BOM* was being shown. Now in case of barcode scanning enabled, option for *Item Group* or *BOM* can be invoked using <ALT+F4> key.
- Sales invoice feeding for country Saudi Arabia, by default option 'Generate E-Invoice' was being shown as 'N'. Now it will be shown as 'Y' by default.
- 'PDC Details' report, provision made to 'Print Instrument Details' in report.
- 'Bank Reconciliation' reports, provision made to show actual bank balance in the bottom of the report.
- Screen reports gets refreshed if any data is changed during drill down. It was problematic when editing multiple entries in bulk through screen reports. Now an option provided in the bottom of screen reports *Do not refresh report after data modification*. If this option is enabled then screen report will not be refreshed after any data modification during drill down.
- Sales Order adjusted in un-approved Sales voucher; Order was being shown as *Pending* in a few reports and as *Cleared* in some other reports. Now in all reports it will be shows as *Cleared*.
- Item-wise Tax% as specified in Item row in Sales/Purchase voucher will also be shown in side panel with other Item row level information.
- Feeding *Dr/Cr Note (w/o Items)*; while specifying the tax account, tax amount was not getting auto calculated as was being done in *B2B Expense* vouchers. Now in *Dr/Cr Notes* also tax amount will be calculated automatically.
- Item MRP-wise stock management, provision made to disallow Qty. Out if stock is not available. Can be enabled in from **Features/Options**→**Inventory** Tab.
- Item's Batch/Parameter-wise details enabled; while changing Item's quantity in Item grid, provision made to update it back in Batch/Parameter details window automatically. Till now this provision was available in BCN mode only.
- Exporting *Dr/Cr Note* in *pdf* format, Voucher No. was not getting appended in export file name. Now it will be appended.

- HDD binding with user/company; separator for multiple HDD was ';' but till now it was possible to specify ':' or ',' as separator which was creating confusion later on. Now it ':' and ',' has been restricted as separator.
- Balance Sheet with second level details on screen, heavy figures (hundreds of crores) were being shown without currency separator. Now it will be shown with currency separator.
- Bulk Voucher deletion utility, till now balances of all masters were getting updated after deletion of vouchers taking a lot of time. Now option provided to update balances of only those masters which were used in vouchers being deleted.
- User not having rights for sending Email/SMS was being prompted for the same after voucher saving and then request was being declined with message for not having rights. Now in this scenario, user won't be prompted for sending Email/SMS after voucher saving.
- Update Sales Price from Purchase Price utility, provision made to make *Effective Purchase Price* as *Minimum Sales Price*.
- 'Production Planning' report; while checking for BOM at second level, for Items having multiple BOMs, first BOM was being considered. Now last BOM will be picked instead of first.
- Downloading *Remote Support Software* from Company menu; TeamViewer 9 was being downloaded. Now TeamViewer 15 will be downloaded.
- Provision made to show *Particulars* in Sub-Ledger report of an account.

### Bugs Removed

- 'Update Sales Price from Purchase Price' feature was sometimes not updating branch-wise price in case of branch user. Now problem rectified.
- Voucher splitting was sometimes showing error 'Dr & Cr Amount should be equal' and voucher was not getting split. Now problem rectified.
- 'Stock Ageing FIFO Basis' generated for a branch was showing those Items also where *Do not Maintain stock Balances* was enabled. Now problem rectified.
- 'Auto Adjust Reference' utility run for a branch was adjusting vouchers for all branches instead of current branch. Now problem rectified.
- While updating Account masters details from GSTIN validation tool, sometimes an error was being shown in SQL mode. Now problem rectified.
- Receipt printing format configured with <ACC\_CATEGORY> field; if no Category was found tagged with Party, an error was being generated while printing Receipt. Now problem rectified.

- Custom column <TOTAL\_TDS/TCS> in Account Ledger was generating error. Now problem rectified.
- TDS configuration options were not being asked in Account master when created under group *Loans (Liability)*. Now problem rectified.
- 'Return Filing Status' field and 'Validate HSN/SAC' button was being shown in Account/Item master for countries other than India also whereas this field is relevant or Indian scenario only. Now problem rectified.
- Re-validating GSTIN in Account master, new details were not getting updated in GSTIN information label shown in Account master. Now problem rectified.
- Parameter-wise stock enabled and BCN not enabled in an Item; while feeding Production voucher if some parameters were specified in both Items consumed and Items generated, an error 'Same BCN cannot be used in both Items Consumed and Items Generated' was being shown. Now problem rectified.
- Printing *Account Ledger* for selected accounts for multiple F.Y., sometimes all entries spanning multiple F.Y. were not getting printed. Now problem rectified.
- Sales voucher data entry, user not having rights to change Item price was able to do so by using F7 key which repeats data from previous row. Now problem rectified.
- Option to disallow price change for a user for selected vouchers, sub user was not able to change price in batch-wise data entry form for all vouchers. Now problem rectified.
- 'Print Entry Level Details' option was not working while printing pending Sales/Purchase Challan report. Now problem rectified.
- Sales voucher converted to Purchase voucher using F6 key, text box *ITC Eligibility* was not getting enabled. Now problem rectified.
- 'Generate/Print E-Way Bill' utility, sometimes Date filter was not working properly. Now problem rectified.
- 'Regenerate Dual Voucher' & 'Rewrite Books' utilities was not impacting nett price of Item in Serial No.-wise/Batch-wise details. Now problem rectified.
- 'Inventory Register' printing, user configured header was not getting printed. Now problem rectified.
- List of Sales Vouchers, if both options *Show MRP* & *Show Report Notes* were enabled then an error was being generated. Now problem rectified.
- If amount adjusted in a bill reference was more than the reference amount, same was not being reflected properly in Bills Summary report. Now problem rectified.
- Duplicating a Purchase voucher and changing the voucher date in new voucher, *Purchase Bill Date* was not getting changed as per new voucher date. Now problem rectified.

- User Dashboard in *Call Receipt* voucher; on pressing <ENTER> on *Call History* voucher, an error was being generated.
- While replicating vouchers, *E-Invoice* details were also getting copied. Now problem rectified.
- Balance Sheet generated for a date range, sometimes on <ENTER> details for *Opening Stock* was showing value as zero. Now problem rectified.
- Importing BOM masters from Excel; if *Item Alias* was specified in place of *Item Name*, BOM was not getting imported. Now problem rectified.
- Sales Order printing configuration, <PRICE\_CATEGORY> field was not working. Now problem rectified.
- Sales invoice discount to be applied on Main Unit and transaction fed in Alt. Unit; while printing invoice, discount was being shown as calculated on Alt. Unit instead of Main Unit. Now problem rectified.
- User rights were not working for some sub menus within *Configuration* menu. Now problem rectified.
- 'Vendor-wise BCN Details' report was showing wrong details in drill down report. Now problem rectified.
- Item Serial-No.-wise data entry; if only one Serial No. row with multiple columns was there and data was copied from Excel sheet, only first cell was getting copy and other cells of the row were not getting copied. Now problem rectified.
- Item barcode printing, field <ITEM\_ALT\_UNIT\_SALE\_PRICE> was not working properly. Now problem rectified.
- BCN date-wise price being maintained, sometimes wrong price was being picked in Sales Return voucher. Now problem rectified.
- If same *Job ID* was used for 'In House' & 'Out Side' Job work; at the time of adjustment in Sales/Purchase voucher, wrong *Job ID* date was being shown. Now problem rectified.
- Sales Quotation in POS data entry mode; price as per Price Category as specified with Party master was not being picked. Now problem rectified.
- Sales Return voucher in POS data entry mode; directly scanning Item Serial No., sometimes an error 'Serial No. not Found' was being shown. Now problem rectified.
- BCN-wise details being maintained; on picking Order details in Sales invoice using F11 key, sometimes an error was being generated. Now problem rectified.
- *Tracking No.* feature enabled; duplicating voucher using F12 key, new Tracking No. as specified in source voucher was not being shown for adjustment in target voucher. Now problem rectified.
- Applying TDS using F4 key in Purchase voucher; both Purchase + Payment amounts were being considered to check the limit of 50 Lac where as it should have been only Purchase amount. Now problem rectified.

- Picking Order details in Sales voucher using F11; if Order was specified in Alt. Cur. and Item batch details also maintained, sometimes Item price was getting set to zero after specifying batch details. Now problem rectified.
- Optional field filter was not working for *Cost Centre Trial Balance* report. Now problem rectified.
- Stock Journal listing was generating error if MRP-wise details were being maintained and report notes was enabled. Now problem rectified.
- Call Management vouchers; user not having access to Call/Inventory management configuration was able to access the same using *Vch. Other Info* button provided in bottom. Now problem rectified.
- Consignment Sales voucher generated from Sales Order with Item-wise discount enabled and then copied to Purchase voucher after saving, an error related to Item discount configuration missing was being shown. Now problem rectified.
- Importing Party-Item-wise price structure, if only *Markup* field was being imported, no value was getting updated. Now problem rectified.
- Updating Sales Price from Purchase Price at the time of voucher saving and updating 'All Incl. Prices'; in case of Multi Rate vouchers having Items with different tax rates, improper 'All Incl. Price' was being calculated (tax amount was being allocated on weighted average basis instead of tax % wise) . Now problem rectified
- List of Sales filtered for one branch was not getting filtered if option 'MC at Item Level' was enabled in configuration. Now problem rectified.
- Voucher Series Group filter was not working for Op. References in *Order-wise Statement*. Now problem rectified.
- Parameter-wise Closing Stock report, if option for grouping on Sales Price was enabled, sometime multiple records for same Sales Price were being shown. Now problem rectified.
- Voucher Series Group filter tagged with user was not working properly for Purchase Indent vouchers. Now problem rectified.
- Generating Invoice from Order using F11 key, MRP as specified in Item master was not getting picked up. Now problem rectified.
- Parameter-wise Profitability report; in *Qty. Out* column, quantity of Item row was being shown instead of quantity of parameter row. Now problem rectified.
- Sales Register Columnar, option 'Show Sales Return also' was not working for users where option 'Hide Value of Items' was enabled. Now problem rectified.

**Release 4.3 (01-11-2021)****Bugs Removed**

- Sending SMS to multiple phone nos. (separated by ;), same were getting delivered to first phone no. only. Now problem rectified.
- Importing vouchers from XML and voucher numbering being set to *Auto*, sometimes voucher numbering was getting disturbed after import. Now problem rectified.
- While showing TDS help during data entry and option 'Include Previous Expenses also' enabled; sometime an error was being generated while showing TDS references window. Now problem rectified.
- 'Cash/Bank Book' with option *Include PDC* enabled, an error was being generated. Now problem rectified.
- Purchase invoice for big values, label showing Party's GSTIN was not visible properly (getting overlapped by Party's balance amount). Now problem rectified.
- TDS Bill Sundry in Purchase voucher being applied on taxable amount, in case of tax inclusive vouchers and *Cess* also enabled, taxable amount was not getting calculated properly. Now problem rectified.
- Balance Sheet with option 'Show Prev. Year's Value' also enabled, value of *Investment* group in Prev. Year was being shown in negative. Now problem rectified.

[Back](#)

## **Release 4.2 (05-10-2021)**

### **Minor Changes**

- Starting from Rel. 4.1, Excise/Service Tax features were discontinued. But to maintain backward compatibility, these features have been restored again.
- Bill-by-bill adjustment details window, provision made to search Ref. No. by typing (intellisense). Till now user had to pick the required Ref. No. using up/down keys.

### **Bugs Removed**

- Starting from Rel. 4.1 sometimes an error was being generated while opening the company. Now problem rectified.

[Back](#)

**Release 4.1 (30-09-2021)**

**Minor Changes**

- Starting from this version, Excise/Service Tax features will no longer be supported in BUSY21. Users who want to check old Excise/Service Tax data can use BUSY18.
- Starting from 1st Oct, businesses dealing in food/consumable products are required to print their *FSSAI No.* and Party's *FSSAI No.* on invoice. To take care of it, provision made to specify *FSSAI No.* in Company and Party master and printing of same in Invoice/Receipt. Can be enabled in **Configuration**→**Features/Options/Inventory** tab. If *FSSAI No.* has been specified, it will be printed in standard Invoice/Receipt.
- Provision made for Report Notes at voucher level in Account/Inventory Registers.
- Sending bulk email through utility; while picking email id using F4 key, provision made to either append or overwrite the existing email id. Till now existing email id was always being over written.
- Data sync from HO to BO, till now un-approved masters and vouchers were getting synced to BO. Now unapproved entries will not be synced.
- Validating GSTIN, in case of some error from backend server, 'NA' was being shown in all fields. Now proper error message will be shown.
- Feeding 'B2B Expense'; if registration type of Party was 'Composition Dealer' no warning was being shown creating confusion later on. Now in such cases, a warning will be shown during data entry.
- Sending SMS with file link (file uploaded to BUSY server), file which was generated in background was not getting deleted from BUSY folder making folder bulky. Now files generated in background will be deleted after sending SMS.
- Usage of command line parameter /ccd (to specify company codes) enhanced. Till now user had to specify the required company codes separated by ';' in the command line itself. Now user can specify /ccd=? in command line to prompt for company codes at run time. Also till now complete company code was required to be specified like comp0201;comp0202 and so on. Now user can specify a sub string of company code and matching company codes will be picked automatically. Like specifying /ccd=20 will include company code comp0201, comp0202, comp0203 and so on.
- Item *Add. Fld. & Description* input form; if Item Description was disabled even then the input form was taking full space looking awkward. Now in this case input form will be resized as per the requirement.

**Bugs Removed**

- In some cases GSTR-4A was not getting downloaded. Now problem rectified.

- Single entry Payment/Receipt voucher and SMS sending enabled after voucher saving; while cancelling the voucher, an error was being generated. Now problem rectified.
- Sending Alerts, if no. of alerts were more than 32K, an error was being generated. Now problem rectified.
- Importing vouchers from XML; if auto voucher numbering was enabled in target voucher series, sometimes auto numbering was getting disturbed after voucher import. Now problem rectified.
- Importing Purchase vouchers with BCN from XML, sometimes data could not be saved with msg 'BCN already exist with different parameter (Alt. Qty. Factor)'. Now problem rectified.
- Columnar Sales Analysis, sometimes an error was being shown if no. of columns were too high. Now problem rectified.
- 'BCN Ageing' report was showing a BCN multiple times if any Sales Return was found for BCN. Now problem rectified.
- Sometimes there was small difference in value of stock as shown in 'Stock Status' report and 'MRP-wise Stock' report. Now problem rectified.
- Designing Item barcode, sometimes height of barcode field as specified during designing was getting disturbed during printing. Now problem rectified.
- Master Series Group on MC level applied to a user and 'MC at Item level' enabled; during data entry if option 'Do not show MC with zero stock' was clicked, MC not belonging to current user were also being shown. Now problem rectified.
- If Purchase voucher rights were not assigned to a user, he was able to see the Purchase transactions through 'Show last transactions' form during data entry. Now problem rectified.
- Applying TDS in Purchase invoice through over & above Bill Sundry where Party whose TDS is being deducted was specified in Bill Sundry itself; TDS references were being created for main Party instead of Party whose TDS was actually being deducted. Now problem rectified.
- Email sent with Excel file as attachment, sometimes Excel file was not getting opened on target computer. Now problem rectified.
- 'TDS on Expense' not enabled in Party master and 'TDS on Gross Payment' enabled and charged in a voucher in POS data entry; during voucher modification TDS reference window was not being shown. Now problem rectified.
- BCN enabled and price applied on Alt. Unit, sometimes BCN price was not being picked properly in Material Issue voucher. Now problem rectified.
- Purchase invoice and picking data from Purchase Order using F11, *Purchase Order No. & Date* was being picked as 'Purchase Bill No. & Date' in Purchase Invoice. Now problem rectified.

- Using *Text* type custom columns in reports, sometimes an error was being generated. Now problem rectified.
- Adding custom columns to List of Dr/Cr Notes; while trying save format of custom columns, browsing window (to pick folder) was not being shown. Now problem rectified.
- If Cash balance was negative, wrong totals were being shown in Cash/Bank book. Now problem rectified.
- Auto voucher numbering with year being embedded as suffix, in case of Nepali date wrong year was being embedded. Now problem rectified.
- 'TDS Audit Report' summarised using F5 key; on clicking on *Deductee Details*, an error was being shown. Now problem rectified.
- Importing tax inclusive voucher from Excel and Item's tax rate based on price, sometimes improper tax was getting applied on Item. Now problem rectified.
- Sales Quotation voucher was being shown as incomplete voucher in 'Check Incomplete Vouchers' utility. Now problem rectified.
- 'Call Register' report; *Entry No.* on the bottom was not refreshing while moving up/down in report. Now problem rectified.
- Voucher modify mode and checking AMC Reference by clicking on 'AMC References' button, an error was being generated. Now problem rectified.
- Item price applied on Alt. Unit and both Discount & Markup enabled, wrong Item price was being picked during data entry. Now problem rectified.
- Field <ITEM\_PENDING\_ORDER\_MAIN\_QTY> was not working properly in Sales Order printing. Now problem rectified.

[Back](#)

**Release 4.0 (18-09-2021)**

**Minor Changes**

- Provision made to change Item's Main Unit after feeding transactions (conditional). While modifying an Item, a button has been provided to change Item's Main Unit. On clicking this button program will check the possibility of unit change and if possible will allow the same. Conditions for unit change are as below:
  - a. Only SuperUser can change Main Unit.
  - b. Alt. Unit and Packing Unit should not be specified for the Item.
  - c. No transaction in any other Unit should be fed.
- Creating new Party, provision made to create by specifying GSTIN and rest of the details being picked online from GST portal. Can be done by using F4 key while creating new Party.
- TDS configuration in Account master, till now it was not possible to enable both types of TDS (Expense & Gross Payment) for a Party. Now both can be enabled in Party master but only one type of TDS can be used in a single voucher.
- 'Bank O/d' was being treated as Loan A/c and TDS details were being asked. Now it will not be treated as Loan A/c.
- Softlock/Dongle registration, sometimes list of Cities/States was being shown as blank (due to connectivity issue) and user was not able to proceed further. Now in such cases dropdown list will be disabled and user will be able type City/State name instead of picking from drop down list.
- Country Nepal; in Export transactions, 'Export Document No. & Date' will be asked which will be used in Nepal VAT registers.
- Cash/Bank Book was not working for Sub Ledgers. Now provision made for the same.
- New country 'Japan' added in dropdown list of countries during company creation.
- Party GSTIN validation in Party master and Item HSN Validation in Item master allowed in Demo mode also. Till now it was not available in Demo mode.
- While specifying GSTIN during Party creation, if there was mismatch between the State as specified in master and State as derived from GSTIN, a message was being shown for the same. Here the State as per GSTIN was not being shown. Now State as per GSTIN would also be shown in the message which will help user to correct the State in master.
- Validating Party GSTIN in Party master, provision made to show address also as specified on GST portal and update it back in master (optional).
- HO/BO data sync, if any master was created automatically during voucher saving, *Check List* details of that master was being shown as blank. Now details of current logged-in user will be shown in *Check List* details.

- Party 'Return Filing Frequency' (Monthly or Quarterly) was being judged on the basis of Party's GSTR-1 filing. Now it will be judged on the basis of GSTR-3B filing as now IFF in lieu of GSTR-1 is being filed monthly by quarterly dealers.
- Calculating TCS rate, provision made to apply 5% for Parties where 'Income Tax Return Not Filed' was set to 'Y'.
- Query System→Search Party option was not searching for Party details in previous year. Now it will search in previous year also.
- Pending Orders report printing for All Item/Party with entry level details was discontinued in last version. Now it has been provided again through *Printing* menu.
- Capital Account / Fixed Assets annexure on screen, while trying to print the same using <ALT+P> option, option 'From BUSY' was not available. Now this option made available.
- Bill-wise Profitability report, new column 'Profit %' added along with profit amount. Till now only profit amount was being shown.
- SMS/BusyApp files were being retained on BUSY server for 30 days. Now it will be retained for 15 days instead of 30 days.
- Bulk Updation of Accounts, fields for TDS & TCS on gross Payment/Receipt was not showing drop down list to choose the value. Now dropdown provided.
- Same account debited & credited by equal amount in a voucher (nett balance zero), cost centre window for that account was not being shown. Now it will be shown.
- Carrying pending BRS entries to next year, if somehow pending entries for a bank could not be carried due to some error, error was not being shown and user had no clue about the error. Now in this case error will be shown on screen and user would be able to correct it.
- Sending Email and picking email id using F4 key; if any email id was already there then same was getting overwritten by the new selected email id. Now provision made either to overwrite or append to existing email id.

### Bugs Removed

- Sending 'Statement of A/c' by email, an error was being shown. Now problem rectified.
- Sending messages to WhatsApp from Excel was not working. Now problem rectified.
- 'Check BUSY Updates' option, release '3.10' was being shown as '3.1'. Now problem rectified.
- Sometimes voucher's ITC Tagging Status was getting removed during Dr/Cr Notes modification. Now problem rectified.

- Making TDS payment through 'Bank O/d Account'; instead *TDS Payment, TDS Reversal* window was being shown. Now problem rectified.
- Cash/Bank Book generated for a Sub Ledger was sometimes generating error. Now problem rectified.
- Balance Sheet with option 'Show Prev. Year Balance also', value of Fixed Assets in last year was being shown negative. Now problem rectified.
- Email with Excel attachment saved in offline mode; while sending the same through utility, Excel file was being shown as pdf file. Now problem rectified.
- Configuring Item Serial No. structure details; on pressing <ALT+M> to modify structure details, instead of structure modification form, main menu was being shown. Now problem rectified.
- Item BCN enabled; during bulk voucher deletion, BCN opening stock was getting disturbed. Now problem rectified.
- Production voucher feeding, if BCN stock was going negative, no warning was being shown. Now problem rectified.
- Production voucher feeding and stock valuation being 'not MC-wise', if some Item was changed in finished goods window, price was being picked 'MC-wise' instead of 'not MC-wise'. Now problem rectified.
- Parameter configuration, if predefined list was enabled and some values specified and then disabled and then enabled again, predefined values were not being shown. Now problem rectified.
- Invoice generated from challan using F11, in multi-user environment two users were able to adjust same challan in different invoices resulting negative balance in challan references. Now problem rectified.
- Selective approval enabled, user who approved a voucher/master was not able to modify the same with message 'You don't have approval rights'. Now problem rectified.
- Updating Item's Sales price from Purchase price after voucher saving, data in Item master's Optional fields was getting lost. Now problem rectified.
- Pending Orders report with parameter-wise details, in case some pending parameters were there from last year's opening balance, wrong balance was being shown. Now problem rectified.
- Depreciation chart, calculation of 180 days (to decide 1st half or 2nd half) was being done from the starting date of F.Y. whereas it should have been reverse calculation from the last date of F.Y. Now problem rectified.
- Compare Purchase Quotation report, if Item Description was added as custom column, Description of all the Items (multiple lines) was being shown against all Items. Now problem rectified.
- Broker-wise Receivable report, if amount adjusted against a reference was more than reference amount, same was being shown as positive instead of negative balance. Now problem rectified.

- Balance Sheet schedule printing and option 'Skip Capital Account & Fixed Asset' enabled, while printing Sundry Debtors & Creditors schedule, zero balance accounts were also getting printed. Now problem rectified.
- POS data entry and focus on any Bill Sundry, if list of Bill Sundries was open and then F4 was pressed to *Apply Tax*, tax was not being applied properly. Now problem rectified.
- Generating Purchase invoice from Purchase Challan using F11, 'Purchase Bill No. & Date' as specified in challan was not being picked. Now problem rectified.
- Import vouchers from Excel, Item-wise discount was being saved properly but was not being reflected in Item information side pane in voucher entry. Now problem rectified.
- Creating new company, status bar was going to 101%. Now problem rectified.
- User dashboard, wrong value of pending challans was being shown. Now problem rectified.
- Item Serial No.-wise details being maintained; while making a Sales invoice, Serial Nos. were being shown in descending order (date-wise) instead of ascending order. This problem started with ver. 3.10 only. Now problem rectified.
- Voucher splitting and additional Journal voucher being created; if bill-by-bill was enabled, an error was being generated. Now problem rectified.
- BCN-wise profitability report; on <ENTER> was generating error. Now problem rectified.
- SMS configuration, if mobile no. or any other parameter was specified with spaces, same was sometimes misbehaving the time of sending SMS. Now problem rectified.
- Sales challan in Alt. Currency and Item-wise markup specified, while creating Sales invoice from challan using F11, markup value was not being picked. Now problem rectified.
- Separate Billing/Shipping details enabled for Cash/Bank only and voucher fed for Cash account and then later on Cash changed to some central Party, an error related to Party state was being shown. Now problem rectified.
- Material Received after Job Work and BCN enabled; while adjusting Job Work reference, an error for blank BCN was being shown. Now problem rectified.
- Stock Ledger with Free Qty.; while pressing F9 to hide an entry, totals were getting disturbed. Now problem rectified.
- Broker-wise Receivable report sorted on Party; if printed directly from grid, wrong totals were getting printed. Now problem rectified.

**Release 3.10 (24-08-2021)****Minor Changes**

- Accounts bulk updation; field 'Create Zero amt. TDS Reference' was not available. Now made available.
- Multi row copy & paste was not working in bulk HSN/GSTIN validation utility. Now it will work.
- While sending Account Ledger by e-mail, till now PDF file was being created by the name 'File1'. Now name of Party will be embedded in PDF file being sent by e-mail.
- Pending Orders with parameter-wise details carried over to next year as opening references; while trying to clear those references in next year, some mismatch between Item pending qty. and parameter pending qty. was being shown. Now opening references of pending Orders with parameter details cannot be cleared in next year and user has to go to last year to clear the same.
- While clearing pending order references pertaining to previous year, date of clearing was being shown of last year (reference date) which was creating confusion. Now beginning date of current F.Y. will be shown as clearing date.
- Provision for printing of TDS/TCS amount in Payment/Receipt/Journal vouchers, till now both TDS & TCS amount within a voucher was getting printed. Now for Payment voucher only TDS amount will be picked, for Receipt voucher only TCS amount will be picked and for other vouchers both amounts will be picked.
- TDS/TCS configuration in Account master; for *Bank o/d Accounts*, by default TDS u/s (194Q) was being set to 'Applicable after Limit'. Now it will be set to 'Not Applicable' which is more relevant.
- List of Accounts, a new option 'Show GST Details' provided which will show GST details of Parties like *Type of Dealer, GSTIN & Filing Frequency*.

**Bugs Removed**

- Import vouchers from Excel; starting from Rel. 3.9, in a few cases Item sub details were not getting imported. Now problem rectified.
- Compound discount enabled and one of the discounts being per unit basis; if value more than 100 was specified in that discount, an error 'Discount cannot be more than 100' was being shown while modifying the voucher. Now problem rectified.
- 'Ageing Analysis' filtered for a Broker was generating error. Now problem rectified.
- 'From Place' in E-Invoice configuration was saving only 20 characters whereas field size was 30 characters. Now problem rectified.

- If 'TDS Applicable' was set to 'Y' in *Bank o/d Account*, an error was being generated while making Payment through that *Bank o/d Account*. Now problem rectified.
- Item Details in *Call Receipt* vouchers were not being shown if 'Check for Update' option was used in Help menu. Now problem rectified.
- Voucher template tagged with Party and header details not tagged; on pressing ENTER on Party, 'Billing Details' were not being picked from Party master. Now problem rectified.
- Item Serial No.-wise stock details report if not filtered on MC was showing wrong stock details after feeding any Stock Transfer voucher. Now problem rectified.
- Account-Cost Centre Summary report, unmoved Accounts were being shown even if Account option 'Moved/Closing' was picked. Now problem rectified.
- Invoice field <TOTAL\_AMT\_WITH\_DEEMED\_TAX> was printing wrong value for vouchers with multiple Items. Now problem rectified.
- Voucher fed in Mobile App and some discount specified with Item; discount was not getting saved in BUSY data during data sync if compound discount was specified in BUSY voucher series configuration. Now if nature of compound discount in BUSY is % then discount will be saved properly.
- Feeding report notes for GSTR-1 (new format), caption for notes was showing *Outstanding Analysis* instead of *GSTR-1*. Now problem rectified.
- Specifying TDS/TCS details in Account master; if both TDS & TCS were disabled for that Account, even then *Payee Category* was being asked. Now problem rectified.
- Importing Items from Excel with *Additional Alias*, in case of blank *Additional Alias* value in Excel, same was getting imported in Item master. Now problem rectified.
- HO/BO data sync, if transaction was fed in *Packing Unit* of Item, same was being set as *Main Unit* of Item in Item master instead of *Packing Unit*. Now problem rectified.
- Material Receipt voucher created from Sales voucher using option 'Copy after Save'; *Tran Type* as specified in Material Receipt voucher configuration was getting disturbed. Now problem rectified.

[Back](#)

**Release 3.9 (11-08-2021)**

**Minor Changes**

- Changes in TDS/TCS module:
  - a. Till now both TDS on Expense Booking and TDS on gross Payment could be enabled for a Party. Now only one type of TDS can be enabled for a Party. Parties for which both types of TDS were enabled, for them TDS on gross Payment (194Q) will be disabled in new version and user will have to enable it again.
  - b. Same for TCS. Both TCS and Sale of Scrap and TCS on gross Receipt can't be enabled. If both are enabled then TCS on Sale of Scrap will be disabled.
  - c. New option provided in Party TDS configuration 'Income Tax Return Not Filed'. If set to Y, TDS/TCS will be applied accordingly (twice of regular rate or 5% whichever is higher).
  - d. Till now if TDS was not charged in a voucher, a message was being shown asking to create zero amount TDS reference. This option was being asked in all Parties whereas it was required for some specific Parties only. Now this option (to create zero amount TDS reference) has been made configurable at Party level. User can specify in a Party whether zero amount TDS reference is required or not.
  - e. TDS on Gross Payment was being calculated from starting date whereas it was made applicable from 01 Jul 2021. Now it will be applicable from vouchers dated 01 Jul 2021 onward.
  - f. TDS configuration for countries Ghana & Pakistan, some option pertaining to India were also being shown. Now it will not be shown.
  - g. TDS Reversal entry was showing pending references for all Parties. Now references only for the current Party (whose voucher is being fed) will be shown.
  - h. TDS on Gross Payment was not working in single entry Payment/Receipt mode. Now it will work.
  - i. Some other refinements related to TDS help & data entry.
  
- BUSY Registration/Installation process, a new field 'Partner Code' added to identity the connected partner.
  
- Item Serial No.-wise details maintained and Serial No. Description also maintained. During multiple movement of Serial No. (Sale, Sales Return and then Sale) if description was changed then the description as specified in first entry was being shown as default. Now description as specified in last entry will be considered as default.
  
- While printing reports, provision made to configure and print upto 3 lines in footer on each page. Useful to print *Signatory Information*. Can be enabled and configured in report options form during printing.
  
- Importing Accounts in Mobile App through Mobile User; in case of large no. of Accounts, import was very slow. Now speed improved.
  
- Till now 'Zero Rated' transactions were being treated as 'Bill of Supply' in Invoice printing and E-Way Bill generation. Now it will be treated as 'Tax Invoice'.
  
- Any Stock report filtered on branch and MC, till now it was possible to select MC which didn't belong to branch. Now in this scenario user will be stopped at report options form.

- 'Search HSN/SAC Code' Utility; if searching is being done on HSN Code and instead of HSN Code some description is specified, then the same will also be searched for relevant HSN code.
- Creating new company; for state 'Laddakh', UTGST caption will be used instead of SGST.
- Item barcode printing configuration, Max. Characters & Max. Decimal fields were not available for configuration. Now made available.
- QR Code printing option was being shown in Account & Item Label printing utility. Now it has been removed as the same can be done through barcode printing utility.
- 'Update Transport Details' utility, *Vch No.* field was showing around 12 characters. Now field size increased to show around 18 characters.
- QR Code printing in invoice/documents, till now size of QR Code was fixed to 1 Inch. Now it has been made configurable. For tag <QR\_CODE,F:xxxx> we can specify the size as <QR\_CODE,F:xxxx,S:n> where n is size of QR Code in inches. For #QRC we can specify as #QRC:n where n is size of QR Code in inches.
- Invoice designing, new field <TOTAL\_AMOUNT\_WITH\_DEEMED\_TAX> provided which will print taxable value + deemed tax value for that invoice.
- Item Serial No. Stock Status & Ageing report, provision made to filter on a Branch.
- Stock Ledger, till now Daily Balance was being shown. Now option provided to show either Daily Balance or Running Balance.
- Ageing Analysis report, provision made to include Un-approved vouchers also.
- Invoice designing, new field <EWAY\_BILL\_DATE\_GST> provided to print/import date of E-Way Bill.
- Country UAE, provision made to specify 'Emirates (Place of Supply)' in Material Centre. Will be used in UAE VAT reports.
- Item Details printing configuration, field 'Amount' was printing amount before tax for an Item. Sometimes it was required to print amount after tax. Now this option has been made configurable (whether amount before tax is to shown or after tax).
- Physical Stock voucher feeding, if option 'Scan Item Sub Details' was enabled, sometimes copy paste of a single Item / Sub Details was not working. This problem was due to provision of accepting multi row data copied from Excel. Now copying of multi row data has been made optional with a separate check box and without enabling this option single row copy paste would be normal.

### Bugs Removed

- Batch Reference Adjustment wizard was not working properly. Now problem rectified.

- Account Ledger Slip Format printing, configurable report header was not getting printed. Now problem rectified.
- Minor corrections in Bills Receivable/Payable Slip format printing.
- POS data entry and Item consolidation enabled; sometimes Item's Alt. Qty. was getting disturbed during consolidation if BCN was specified in voucher. Now problem rectified.
- Item Quantity-wise Discount enabled and Item feeded through multiple alias, discount per quantity was not being picked. Now problem rectified.
- Printing composite barcode after saving voucher, Alt. Qty. Con. Factor was not getting rounded. Now problem rectified.
- Selective data freezing was not working in case of Nepali Date. Now problem rectified.
- Carrying Pending ITC entries to next year was generating error in SQL mode. Now problem rectified.
- Pending Orders report with parameter-wise details, wrong opening parameter-wise details were being shown. Now problem rectified.
- Inventory Sales register, if MRP custom column was inserted and parameter details were also enabled, sometimes wrong MRP was being shown. Now problem rectified.
- Pending Order report filtered on MC was generating error. Now problem rectified.
- Bill-wise Statement, wrong value was being shown in 'Due Date' column. Now problem rectified.
- Item Consolidated Summary generated for a branch, wrong Op. Stock value being shown if Item-wise MC was enabled. Now problem rectified.
- Import vouchers from Excel, if Party was specified through <PARTY\_ALIAS> field, multiple different vouchers were being imported as a single voucher in BUSY. Now problem rectified.
- Branch user login, current stock in Item's drop down list was being shown for all MC instead of MC tagged with branch. Now problem rectified.
- HSN Validation in Item master, date-wise HSN was not getting validated. Now problem rectified.
- Unapproved Sales voucher with settlement details applied over & above, while approving the voucher through approval utility, settlement details were getting lost. Now problem rectified.
- Audit Trail→Masters List report; sometimes on pressing <ENTER> on any master, wrong master details were being shown. Now problem rectified.
- User Dashboard, pending orders figures was not getting filtered as per the MC specified in Dashboard configuration. Now problem rectified.

## Busy

- Bulk generation of Production vouchers, Item's MRP as specified in Item master was not getting set in production vouchers being generated. Now problem rectified.
- Pending Order report generated for one/selected MC, wrong current stock was being shown on screen. Now problem rectified.
- Job work enabled and 'Maintain Finished Goods References' disabled, while pressing F11 during Sales voucher, some arbitrary finished goods references were being shown for adjustment. Now it will not be shown.
- Voucher splitting, sometimes target voucher could not be saved with error 'Debit & Credit amount should be equal'. Now problem rectified.
- Voucher configuration disabled for a user, he/she was still able to do so through Call Management vouchers. Now problem rectified.
- Minor correction in Tax Category master related to configuration of 'KFC'.
- Bill Sundry configured for calculation on 'Taxable Value'; same was not getting calculated properly in multi-rate vouchers. Now problem rectified.
- Item Serial No. printing configuration, length of Serial No. as defined in configuration was not coming into effect during printing. Now problem rectified.

[Back](#)

**Release 3.8 (13-07-2021)**

**Bugs Removed**

- TCS on Gross Receipt disabled for a Party, same being applied while pressing F4 (Apply Tax) during data entry. Now problem rectified.
- Purchase invoice fed in continuation; TDS on Gross Payment was being applied in first invoice only and not in second invoice onward. Now problem rectified.

[Back](#)

**Release 3.7 (06-07-2021)**

**Minor Changes**

- TDS/TCS on gross Payment/Receipt; till now we could specify in Party master whether to apply the same after crossing the limit (50 L) or from starting. Now another option provided, 'Not Required' to specify that TDS/TCS on gross Payment/Receipt is not to be applied for this Party.
- Provision made to create zero amount TDS references in Salary Calculation. To be enabled in Payroll configuration and if enabled, user would be prompted to create TDS references of those Employees whose TDS has not been deducted.
- Softlock activated in one computer; to activate it at some other computer, it was mandatory to surrender the softlock first and then reactivate. Now surrender is not necessary and softlock will be surrendered automatically while re-activating at another place.
- Account master; fields related to Bank Details were visible for Parties only. Now it has been made available for Expense/Income accounts also.
- Pending Orders report was available for 'One MC' or 'All MC'. Now provision made to generate for 'Group of MC' & 'Selected MC' also.
- While changing F.Y., unreconciled bank entries were always being carried over to next year which was time consuming. Now it has been a provided separate option in Change F.Y. menu and will not be carried over automatically. Users who need this can use this separate option to carry unreconciled bank entries to next year.
- Provision made to generate Balance Sheet Annexures for 'Capital Account' and 'Fixed Assets' in required format. To generate schedules in required format, user can add tags to individual entry of Fixed Asset/Capital Account ledgers while viewing on screen using F6 key. Once the relevant tags are added, user can generate these annexures in required format through **Display→Final Results→Balance Sheet→Annexure (Fixed Asset/Capital Account)**.
- Generating bulk Purchase from Challan, 'Input Tax Eligibility' was being set to 'None'. Now it will set to 'Input Goods/Services'.
- To filter list of companies on the basis of company code, a new command line parameter provided '/ccd'. Multiple companies can be specified using ';' as separator, i.e. 'C:\BusyWin.exe /ccd=comp0001;comp0003;comp0005' and so on.
- Compound Discount enabled and one of the discount type being *Absolute*; during Items consolidation, discount was not getting consolidated properly. Now in case of absolute discount, consolidation will not work (as in case of simple discount).
- Option 'Check BUSY Updates' was available in *Company* menu. Now made available in *Help* menu also.

- Importing vouchers from Excel; if value of 'Party Name' column was provided as one of the multiple aliases, same was not being recognised. Now it will be recognised.
- Item BCN scanned directly in Item grid and quantity changed manually; if quantity specified was more than the balance available in BCN, it was being rejected. Now it will be rejected only in case of Sales (Qty. Out) and not in case of Purchase.
- Specifying Item's multiple price values; value more than 100 was not being accepted in Discount column but same was required in case of absolute discount. Now it will be accepted.

### Bugs Removed

- 'Expense – GST Nature wise' report was sometimes showing incorrect data if any taxable Purchase Type was modified and resaved. Now problem rectified but user will have to resave the taxable Purchase Type modified earlier.
- Service Tax configuration, on clicking 'Signatory Details' an error was being generated. Now problem rectified.
- Invoice generated from Orders using F11, if Multi-Godown feature was disabled then stock of Items was not being shown during data entry. Now problem rectified.
- Voucher splitting enabled; if after splitting no Item was left in original voucher, wrong Invoice No. was being printed on invoice. Now problem rectified.
- Query on Production vouchers after cancelling a few Production vouchers, sometimes an error was being generated. Now problem rectified.
- Stock Status generated for 'Selected MC' with option show Pending Orders also enabled; pending orders were being shown for all MC. Now problem rectified.
- Carrying pending ITC entries to next year in SQL mode, an error was being generated. Now problem rectified.
- Downloading and saving GSTR-1 JSON file, sometimes an error was being generated. Now problem rectified.
- Item Batch-wise stock being maintained and Batch-wise Sales Price also being maintained, sometimes in SQL mode the Sales Price of Batch as specified in Purchase voucher was not getting picked automatically. Now problem rectified.
- Change F.Y. with option 'New & Changed Masters Only'; newly created Master Series Groups were not getting carried over to next year. Now problem rectified.

- Master Series Group enabled on Accounts and no. of accounts being more than 10000; sometimes while printing Journal voucher, system was getting hanged. Now problem rectified.
- Item parameterised stock enabled and picking data from orders using F11; sometimes wrong parameterised details were being picked if *Free Qty.* feature was enabled. Now problem rectified.
- BLS related features were not available on last date of BLS validity. Now problem rectified.
- Importing vouchers from Excel, if any numeric field had value in 9 decimal places or more, same was not getting imported properly. Now problem rectified.
- Applying Tax using F4 key and F4 key pressed multiple times, TDS Bill Sundry was being applied multiple times. Now problem rectified.
- Warning for TDS on gross Payment during Payment voucher was sometimes not working properly. Now problem rectified.
- Showing last transaction during data entry; if user was bound with a branch, entries were getting filtered as per branch Voucher Series Group even if option 'Disable Voucher Series Group Filter for Reporting' was enabled. Now problem rectified.
- Sales Register generated for a particular Voucher Series and option 'Include Sales Return' also enabled, sometimes some wrong entries were being shown. Now problem rectified.
- Sales Register Columnar generated for a particular Voucher Series and option 'Include Sales Return' also enabled, sometimes an error was being generated. Now problem rectified.
- Profit & Loss in vertical format was including un-approved vouchers also. Now problem rectified.
- Hierarchical Stock Status, sometimes an error 'Overflow' was being generated. Now problem rectified.
- Standard invoice configuration with *Self Configured* body, sometimes from second page onward, vertical lines were getting misaligned. Now problem rectified.
- Party Credit Limit enabled; amount paid by Cash through settlement details was not being considered during checking of credit limit. Now problem rectified.
- Bulk Receipt utility, amount receivable was being shown rounded to zero decimal places. Now problem rectified.
- Even if TDS feature was disabled, menu 'Payments Eligible for TDS' was being shown. Now problem rectified.
- Problems rectified in Scheme Management:
  - a. Scheme configured with multiple units of same Items was not getting applied properly during data entry. Now problem rectified.

## Busy

- b. Multiple schemes configured; one for discount and one for free qty., scheme was not getting applied properly if Items belonged to different groups. Now problem rectified.
- c. Configuring scheme Item-wise with option as free different Item; same was not getting saved if free Item had same Main & Alt. Units. Now problem rectified.

[Back](#)

**Release 3.6 (10-06-2021)****Minor Changes**

- Account Ledger printing, option provided to print *Slip Format* in two panes also (like Bills Receivable/Payable).
- TDS/TCS applicable on gross Receipt/Payment exceeding 50 Lakh, this limit was being checked in current as well as previous year both. Now checking for previous year has been made configurable in TDS/TCS configuration.
- Bills Payable report, provision made to check status of vendor's invoice upload status in GSTR-2B also. Till now provision was available for GSTR-2A.
- 'Search HSN/SAC Code' utility, font size of grid decreased to make more data visible on screen without scrolling the grid.
- 'MC at Item Level' enabled, name of MC used with an Item will be shown in side panel along with Item grid.
- POS data entry with MC frozen and picking data from pending orders using F11; if orders belonged to a different MC, a message was being shown and user had the choice to update the MC as per orders. Now in case of frozen MC, option to change MC will not be there and only a message will be shown.
- 'Carry Pending ITC Entries' utility; if any Party was available in previous year and not in next year, entries related to that Party were not being carried over. Now in this scenario, user will be prompted to change F.Y. first so that the new Party is carried over to next year and then come back and run this utility
- Voucher Series created in previous year and option 'Carry New & Changed Masters Only' used during change F.Y., newly created voucher series was not getting carried over to next year. Now it will be carried over.
- Option to specify different *Dispatch Details* for E-Way Bill/E-Invoice, fields for *Dispatch Details* specified here were not available in invoice designing. Now these fields made available in invoice designing.
- Import Accounts from Excel, provision made to import 'TCS Applicability' and 'TCS Payee Category' fields.

**Bugs Removed**

- 'Mapping of Masters' utility, if no. of masters already mapped (through BDEP) were more 999, an error was being generated while using this utility. Now problem rectified.
- Creating new company for 'Composition Dealer' was generating error. Now problem rectified.
- MRP-wise Stock being maintained, in case of Packaging Unit, wrong price was being picked. Now problem rectified.

## Busy

- Stock Status report with pending orders with filter on Vch. Series Group, sometimes incorrect details of pending orders were being shown on pressing <ENTER>. Now problem rectified.
- Selective Approval was not working properly if approval was applied on *Due Bills + Credit Limit Crossed*. Now problem rectified.
- Contra entries were not being shown properly in Cash/Bank Book if option 'Show Single line for Sales/Purchase' was enabled. Now problem rectified.

[Back](#)

**Release 3.5 (27-05-2021)****Minor Changes**

- 'Search HSN/SAC Code' utility; on pressing <ENTER> on any row, *Description* will be shown in message box. Till now long description was not visible fully.
- Provision made to invoke 'Search HSN/SAC Code' utility from 'HSN Validation' form.
- If minimum HSN Code digits were specified in GST configuration, there was no warning for the same during data entry but warning was there in reporting. Now warning provided during data entry also.
- Warning for TDS/TCS on the basis transaction value; in case of *Sub Ledger*, PAN of *Sub Ledger* was being checked. Now instead of PAN of *Sub Ledger*, PAN of its *General Ledger* will be checked as in books of accounts, *General Ledger* is being used.
- 'Update Purchase Bill No. & Date' utility, *Party Amount* of Purchase voucher was being shown. Now instead of *Party Amount*, *Bill Amount* will be shown.
- Balance Sheet generated for a Voucher Series Group, option 'Show P.Y. Balance also' was also being shown but was not relevant in this scenario. Now user cannot enable this option if Balance Sheet is generated for a Voucher Series Group.

**Bugs Removed**

- 'Update Transport Details' utility, an error 'Party Amount cannot be changed' was being shown. Now problem rectified.
- Printing Item barcode after voucher saving, fields 'Item Description 11-20' were not getting printing. Now problem rectified.
- Parameter-wise Profitability report was showing cost as zero if quantity was generated through Production voucher. Now problem rectified.
- Warning for zero Item amount during data entry was not working properly in multi-currency vouchers. Now problem rectified.
- Showing last transactions during data entry, list of transactions were not getting filtered on Branch/Vch. Series Group tagged with user. Now problem rectified.
- Importing Item masters from Excel, fields related to *Compound Discount* were not getting imported if more than one discount was specified in Excel sheet using '+' sign. Now problem rectified.
- Profit & Loss vertical format with option 'Show P.Y. Balance also' enabled, wrong value for P.Y. Op. Stock was being shown. Now problem rectified.

## Busy

- Bill Sundry being calculated on Item markup was sometimes disturbing taxable value of invoice. Now problem rectified.
- Multiple years exist and TDS u/s 194Q enabled in current year and a new account created in current year, sometimes an error 'Invalid Account' was being shown while feeding accounting vouchers. Now problem rectified.

[Back](#)

**Release 3.4 (21-05-2021)**

**Minor Changes**

- Provision made to deduct TDS u/s 194Q (Purchase/Payment above 50 Lac with a single Party). This provision is same as was with TCS. Can be enabled in TDS configuration.
- Account master new fields added 'TDS Applicable u/s 194Q' and 'TCS Applicable u/s 206C(R)'. If enabled, TDS/TCS will always be applicable on this Party irrespective of value of his transactions.
- To apply TDS u/s 194Q (Transactions more than 50L with a Party), a new *Bill Sundry Nature* provided while creating Bill Sundry. Bill Sundry with this nature will be applied automatically during Sales voucher for TDS u/s 194Q.
- While creating any Bank A/c option provided to specify *Bank Name & IFSC Code* also along with *Bank A/c No.*
- Changing F.Y.; an option was there to carry 'Pending ITC Entries' to next year during change F.Y. process. Now this option has been removed from change F.Y. form and has been provided as a separate option in Change F.Y. menu.
- Cash Book/Bank Book, new option 'Show single line for Sales/Purchase' provided. If enabled, single line will be shown for Sales/Purchase vouchers and for other transactions all details will be shown.
- Account Ledger; various options were available to show the level of details in each entry. Now one more option has been added 'Other Accounts (Auto)'. If this option is chosen, all other accounts for accounting voucher will be shown and for Sales/Purchase voucher a single account will be shown.
- **Misc. Data Entry**→**Update Purc. Bill No. & Date** option, provision made to show Party amount also in the grid.
- **Misc. Data Entry**→**Update Billing Details** option, option provided for *Update & Print* data. Till now *Update & Print* were available as separate options.
- Utility provided to search full HSN/SAC details and matching with 6 or 8 digit HSN codes on the basis HSN/SAC description or 4 digit HSN/SAC codes. Available as **Transactions**→**GST Misc. Utilities**→**Search HSN/SAC Code**. This option will also be available while checking HSN/SAC code during Item/Account creation.
- Bulk HSN/SAC Validation utility; provision made to revalidate all HSN/SAV in one go. Till now HSN/SAC already validated were not getting revalidated through this utility.
- Data import through XML, till now unique key for voucher identification was *Vch. Series + Vch No. + Date*. Now provision made to *Vch. Series + Vch. No.* also.
- MC being frozen in Sales voucher; while picking data from pending orders using F11 and different MC specified in Sales Order, MC as specified in Sales Order was getting updated in Sales voucher. Now in such scenario, MC will not be updated and a warning will be shown for different MC.

- Minor changes in narration of interest vouchers being created through Interest Calculation report.

**Bugs Removed**

- Importing Receipt vouchers with PDC from Excel in single entry mode, an error 'Bank A/c is missing' was being shown if instead of Bank A/c name, Bank A/c alias was specified. Now problem rectified.
- Data exchange through BDEP; if Sales voucher was saved as Purchase voucher, TCS references with Sales voucher was being saved in target Purchase voucher creating problem in reports. Now problem rectified.
- Sometimes while saving Purchase voucher with Item-wise Markup entries, voucher could not be saved with message 'Debit & Credit amounts not equal'. Now problem rectified.
- Cost Centre window through pure inventory voucher, amount was being shown as 'Cr' which was creating confusion. Now problem rectified.
- BUSY used with /LGP flag, data sync. From Mobile App was being restricted. Now problem rectified.
- MRP-wise Stock being maintained along with Items price categories; while changing price category during data feeding, MRP-wise price for category 'A' was not being updated in Items. Now problem rectified.
- Material Receipt (after Jobwork); if data was picked using F11 key, Markup Structure was not being picked as specified in Voucher Series configuration. Now problem rectified.
- Creating TDS entries through Purchase voucher, TDS help was not being shown from second voucher onward if data was fed in continuation. Now problem rectified.
- Option 'Hide Value of Items' enabled for a user, he was able to see the tax summary in Material Issue/Receipt voucher. Now problem rectified.
- If any special character was specified in Company's short name, an error was being generated while sending mails from BUSY directly. Now problem rectified.
- While drilling down through Balance Sheet, sometimes Groups with zero balance were also being shown. Now problem rectified.
- Bills Receivable/Payable report was sometimes generating error. Now problem rectified.
- Bill-wise Profitability report was not getting filtered on Vch. Series group if same was specified in Branch of a user. Now problem rectified.
- Stock Status with pending Order entries, Op. Order references were not getting filtered on user's branch. Now problem rectified.
- Balance Sheet generating for a branch with option 'Include Pending Challans' enabled, an error was being generated. Now problem rectified.

## Busy

- Bills Receivable/Payable in slip format for Nepali Date, date was being printed in Roman instead of Nepali. Now problem rectified.
- TDS Reversal entry, default amount for Assessable value & TDS amount was not being picked from voucher. Now problem rectified.
- Creating Account master; after saving an entry, WhatsApp No. was not getting initialised which was creating confusion in next master. Now problem rectified.
- Voucher Splitting utility; voucher were not getting filtered properly if MC at Item Level was enabled. Now problem rectified.

[Back](#)

**Release 3.3 (26-04-2021)****Minor Changes**

- Sales Invoice; picking data from pending Orders using F11 key, Material Centre name was not getting picked. Now it will be picked.
- Option to print User's Signature in standard invoice configuration was being shown in Basic edition also whereas this feature was not applicable for Basic edition. Now it has been removed in Basic edition.

**Bugs Removed**

- Splitting voucher on the basis of Item Optional Field; if no Item was left in source voucher, an error 'Invalid Account Amount' was being generated while saving the voucher. Now problem rectified.
- Changing F.Y., sometimes pending opening Job Work (In House) references were not getting carried over properly. Now problem rectified.
- Payment/Receipt voucher feeding; sometimes an error 'Invalid Account Name' was being shown. Now problem rectified.
- Sales Invoice; picking data from pending Orders using F11, sometimes Items were not getting picked. Now problem rectified.
- Tracking No. enabled; sometimes an error 'Overflow' was being generated while showing Tracking No. window in Stock Transfer voucher. Now problem rectified.

[Back](#)

**Release 3.2 (20-04-2021)****Minor Changes**

- New utility provided to check details of E-Way Bills generated by others on our GSTIN (like transporters). Available as **Transaction→GST Misc. Utilities→E-Way Bill Management→E-Way Bill Details (Generated by Others)**.
- Payment Reminder printing, provision made to print Bills Payable also (like Bills Receivable report).
- Provision made for QR Code printing in Receipt/Payment Advice/Cr Note/Dr Note. Till now it was available in Sales/Purchase only.
- TCS applicability for 50 Lac of gross Sales/Receipt was being checked in current year's data only. Now this threshold will be checked in previous year's data also as per the government guidelines.
- Country OMAN; while creating any Party, length of TRN was being checked for 15 characters which was not required in OMAN. Now it has been removed.
- Country OMAN, caption of TRN changed to VATIN.
- Specifying Party-Item codes, no. of rows were restricted to 999. Now option provided to add more rows if required.

**Bugs Removed**

- Importing Item batch-wise opening stock, sometimes value of Items was not getting imported. Now problem rectified.
- Applying compound discount; if one discount was in Packaging Unit and another in %, during voucher modification an error 'Invalid Discount' was being shown. Now problem rectified.
- Call Register on screen; sometimes custom data field <VCH\_DATE\_AND\_TIME> was generating error. Now problem rectified.
- Item-wise discount decimal places set to 4; same was being shown as 2 during bulk Item Addition/Modification screen and Bulk Updation of Discount/Markup utility. Now problem rectified.
- Payment/Receipt vouchers in multi-currency mode were not getting imported from Excel in Single Entry mode. Now problem rectified.
- Auto creation of Bill references enabled, user was not able to modify reference details (like due date) by switching to manual mode. Now problem rectified.
- While creating Material Issue voucher automatically after saving Sales voucher, sometimes an error 'TCS Ref. No. already exist' was being shown. Now problem rectified.

- Item MC-wise data feeding, if user did not have rights for Configuration → Features/Options, he was not able to check the option 'Don't show MC with Zero Stock'. Now problem rectified.
- Invoice printing; in case of high tax value, sometimes an error was being generated in printing Tax Summary. Now problem rectified.
- Monthly Target Variance report was showing incorrect data for Nepali Date. Now problem rectified.
- Pending Orders report with parameter details, parameter details were not being shown in opening references if report was generated for a single Party. Now problem rectified.
- Sales price was not being shown in 'BCN-wise Stock Detailed' report. Now problem rectified.
- Consignment Order Summary report; if any custom column was used, data was being shown in first row only. Now problem rectified.
- PDC carried from last year and regularised in current year were not being reflecting properly in Bills Receivable/Payable report. Now problem rectified.
- Minor rectifications in Change F.Y.:
  - a. Masters deleted in previous year were always being shown getting carried over to next year. Now problem rectified.
  - b. Sometimes an error 'Overflow' was being generated. Now problem rectified.
  - c. Multiple Accounts/Items tagged with Mobile User in previous year were getting duplicated in next year. Now problem rectified.

[Back](#)

**Release 3.1 (05-04-2021)****Minor Changes**

- Changes in compulsory Audit Trail feature:
  - a. Audit Trail was made compulsory for companies from year 01.04.2021. Now it has been made compulsory from 01.04.2022 as per the new guidelines.
  - b. Constitution of firm/company was being checked from GSTIN. Now it will be checked first from GSTIN and in case of blank GSTIN, it will be checked from PAN.
  - c. GST configuration, constitution of firm/company will be shown along with GSTIN.
- Changing F.Y., option 'Don't Carry Pending ITC Tagging entries' was disabled by default and ITC tagging entries were being carried over which was taking time. Now this option will be enabled by default and pending ITC tagging entries will not be carried over. Also if user is not using this utility and above option is enabled then user will be prompted to disable this option.

**Bugs Removed**

- Sales invoice feeding through Sub-ledger, sometimes 'Credit Limit Crossed' message was being shown even if credit limit was not crossed. Now problem rectified.
- Change F.Y., sometimes an error 'Invalid use of null' was being shown. Now problem rectified.
- Item BCN-wise details enabled, sometimes 'Maintain BCN' option in Item master was getting disabled automatically. Now problem rectified.
- POS data entry, change in font size of captions in Item grid was not working properly. Now problem rectified.

[Back](#)

**Release 3.0 (30-03-2021)****Major Changes**

- As per the latest MCA guidelines, 'Date Check List' renamed as 'Audit Trail' and it will always be maintained for Pvt. Ltd. & Public Ltd. Companies in Enterprise edition. Whether it is a Pvt. Ltd. Or Public Ltd. Company will be checked from GSTIN of the Company. For Proprietary & Partnership firms, Audit Trail will be optional (as it is working now).

**Minor Changes**

- Bills Receivable/Payable printing in slip format, provision made to print *On Account Amount & Ledger Bal.* also.
- While cancelling any voucher (using ALT+X key), provision made to cancel the corresponding E-Way Bill/E-Invoice also within BUSY. No need to go to portal to cancel E-Way Bill/E-Invoice.
- Transport Details; if 'Separate Dispatch Details' option was enabled, *Check Distance* option was taking source pin code from company details instead of Dispatch Details. Now it will take source pin code from Dispatch Details.
- Configurable GST Summary printing in Invoice footer; a new field 'Total Amt.' provided which will print Taxable + Tax amount for the specified row.
- Change F.Y., a new checkbox 'Don't Carry Pending ITC Entries for Tagging' provided. If enabled, pending entries for ITC tagging will not be carried over to next year. Required when a user is not using this feature and carrying ITC entries take a lot of time.

**Bugs Removed**

- Stock Transfer voucher in POS data entry mode, Master Control for Party was misbehaving. Now problem rectified.
- Changing F.Y., sometimes an error 'Overflow' was being generated. Now problem rectified.
- Bills Receivable/Payable printing in slip format, sometimes data was being printed to next page whereas space was available in right pane. Now problem rectified.
- Updating *Sales Price* from *Purchase Price* during data feeding, sometimes 'Enable BCN' option was getting disabled in Item master. Now problem rectified.

[Back](#)

**Release 2.3 (23-03-2021)****Minor Changes**

- Provision made to print B2C QR Code in invoices for users having E-Invoicing enabled:
  - a. Enable B2C QR Code printing in GST/E-Invoice configuration and specify details related to B2C QR Code.
  - b. Enable printing of B2C QR Code in standard invoice configuration.
  - c. In configurable format, field <EINVOICE\_QRCODE> will print E-Invoice QR Code for B2B invoices and B2C QR Code for B2C invoices.
- Document designing, a new tag '#ncf' provided for use with numeric fields. If specified then the value of numeric field will not be formatted with currency separator during printing. NCF stands for *No Currency Formatting*.
- E-Invoice configuration, new option 'Restrict sub-user to change E-Invoice Applicability' provided. If enabled, sub-user won't be able to change E-Invoice applicability (like E-Way Bill).

**Bugs Removed**

- Importing voucher from Excel, if no. of Bill Sundries being imported was more than 50, an error was being generated. Now problem rectified.
- Trial Balance on screen, sorting on Opening or Closing Balance columns (showing values with Dr/CR) was not working. Now problem rectified.
- Stock Status Grouped with option to show 'Book Stock' only; during drill down, details for wrong date range was being shown. Now problem rectified.
- Bills Receivable/Payable report printed Party-wise and sorted Group-wise, parties with no pending bill were also getting printed. Now problem rectified.
- Credit Limit enabled; while modifying any voucher, sometimes error for credit limit getting crossed was being shown even if credit limit was not getting crossed. Now problem rectified.
- Configurable list of accounts, fields <STATION> & <TRANSPORTER> were not showing full value as specified in account master. Now problem rectified.
- RCM Register Monthly, while generating consolidated RCM voucher, wrong data was being posted for vouchers having 'ITC Eligibility' as *None*. Now problem rectified.
- Day Book with single line details, amount for Sales voucher was being shown on wrong side. Now problem rectified.
- Auto generation of Invoice from Challan, sometimes there was a rounding off issue resulting in slight mismatch between challan and invoice value. Now problem rectified.

**Busy**

- Stock Transfer in POS mode, master controls for source Material Centre was not working properly. Now problem rectified.

[Back](#)

**Release 2.2 (13-03-2021)****Minor Changes**

- Trial Balance-Grouped, provision made to show comparative data with last years (like Trial Balance-Alpha).
- Provision made to specify minimum no. of digits for HSN Codes. Can be specified in GST configuration. If any value is specified here (like 4 or 6 or 8), it will be validated while specifying HSN Code in during data entry.
- Account label printing configuration; new field added 'Paper Type' where user can specify either A4 or *Envelope*. Required while Account label needs to be printed on Envelope.
- Sales/Purchase Challan for Export/Import transaction type, provision made to input 'Shipping Details' along with 'Port code'. Required to generate E-Way Bill.
- Accounting enabled for Material Issue & Receipt vouchers through Bill Sundries; it was working for plain Material Issue & Receipt vouchers and not for Sales/Purchase Challans. Now it will work for all Material Issue & Receipt vouchers.
- Consignment vouchers feeding with blank voucher no., sometimes an error was being generated. Now consignment voucher will not be allowed with blank voucher number.
- Provision made for new TCS rates *w.e.f.* 1<sup>st</sup> April (.1 % for Parties with PAN & 1% for Parties w/o PAN).
- Sales/Purchase Register, provision made to show Payment/Receipt Details against Invoice.
- Sales/Purchase Register, till now 'MC Name' was always being shown. Now it has been made optional.
- 'Profit & Loss Detailed Monthly' report, till now second level details with all groups were being shown. Now provision made to show either second level details or account level details.
- Creating new company for country Nigeria, default tax rate was being shown as 5%. Now changed to 7.5%.
- Auto creation of Party references enabled in Sale/Purchase vouchers; during data feeding, bill reference window for other accounts having bill-by-bill enabled was not being shown. Now window for other accounts will be shown and Party reference will be created automatically.
- Warning for TCS was being shown for *Export* transactions and *Stock Transfer* (to our own branch having same PAN). Now in both of these case TCS warning will not be shown as TCS is not applicable in these cases.
- Nepal country, provision made to test the online upload facility using test user as per guidelines of Nepal IRD.

- Credit Limit enabled and invoicing not allowed after crossing of Credit Limit, same was not working during voucher replication. Now in such scenario voucher will not be replicated.
- Provision made for bulk cancellation of vouchers using <ALT+X> key through screen reports. User can select multiple rows and then can use <ALT+X> key to cancel all the selected vouchers.
- Sales Challan/Sales Invoice printing with Separate Billing Details option enabled, caption for Challan/Invoice date was being shown as 'Date of Invoice' which was creating confusion in case of Sales Challan. Now it will be shown as 'Dated'.

### Bugs Removed

- Item-wise tax enabled, wrong tax was being calculated in case of negative quantity (Sales Return in Sales). Now problem rectified.
- POS data entry in Stock Transfer; scanning Item Serial No. barcode directly, Serial No.'s Sales Price was being picked instead of cost price. Now problem rectified.
- Letter Text Configuration, node for 'Confirmation of GST' was not being shown. Now problem rectified.
- Importing accounting vouchers from Excel; while checking voucher history, source was being shown as 'Feeded' instead of 'Excel Import'. Now problem rectified.
- On clicking 'User Signature' in user profile, a message 'This feature is not enabled' was being shown even if same was enabled. Now problem rectified.
- POS configuration; Batch No. reading from barcode, if enabled, was not working. Now problem rectified.
- Bills Receivable/Payable printing in slip format, sometimes parties were not being printed in alphabetical order. Now problem rectified.
- Stock Status Alphabetical being seen with Item MRP; in case of branch user, HO MRP was being shown instead of branch MRP. Now problem rectified.
- Party-Item price structure feeding, while trying to search an Item using <CTRL+ALT+S>, some irrelevant text was being shown. Now problem rectified.
- De-activate masters utility, while trying to deactivate Sale Type, sometimes an error was being generated. Now problem rectified.
- Print report header configured in second language was not printing data in second language. Now problem rectified.
- Multiple MRP being maintained with BCN, if during data entry Item Qty. was changed in Item grid; same was not getting changed automatically in parameter details window. Now problem rectified.

- Account Ledger generated without short narration and then date was changed using F2 key, short narration column was being. Now problem rectified.
- Call Receipt voucher; SMS could not be sent using <ALT+S> through printing report options form. Now problem rectified.
- If Round Off (-) Bill sundry was used in a voucher, wrong voucher amount was being shown in Day Book (Single Account). Now problem rectified.
- Pending Indent report generated for selected MC was generating error. Now problem rectified.
- Indent-wise Statement report was not getting filtered for selected MC. Now problem rectified.
- 'Purchase/Sale without Order' report was sometimes showing zero value entries. Now problem rectified.
- Production Variance voucher-wise report was sometimes not showing correct data if some manual entries were done in Production voucher after picking data on the basis of BOM. Now problem rectified.
- Cost Centre Ledger was not getting filtered branch-wise. Now problem rectified.
- BCN-wise ageing report was sometimes generating error. Now problem rectified.
- Account Sub-Ledger on screen generated for all Sub Ledgers under a General Ledger was sometimes generating an error. Now problem rectified.
- AMC/Warranty Details Report; while clearing some opening references, all opening references were getting cleared. Now problem rectified.
- Parametrised Stock Status Columnar report was sometimes generating error. Now problem rectified.
- Purchase Indent entries were being shown as incomplete in 'Check Incomplete Vouchers' utility. Now problem rectified.
- 'On Account Parameter entries' report was sometimes generating 'Overflow' error. Now problem rectified.
- Standard invoice printing in landscape mode, second language details were not getting printed. Now problem rectified.
- Amount Receivable/Payable report for a branch with option 'Include PDC' enabled, incorrect balance was being shown. Now problem rectified.
- Bill-by-bill details window, sometimes a message was being shown 'Amount not fully adjusted' even if amount was fully adjusted. Now problem rectified.

**Release 2.1 (20-02-2021)**

**Bugs Removed**

- Item-wise tax calculation during data feeding was misbehaving in a few cases. Now problem rectified.
- Sub-ledger report on screen for all Accounts was generating error. Now problem rectified.

[Back](#)

**Release 2.0 (17-02-2021)****Major Changes**

- Changes in BCN Module:
  - a. Provision made to maintain multiple MRP with a BCN. Till now only one MRP was allowed.
  - b. If BCN was enabled along with parameters, it was getting applicable for all Items. Now BCN can be enabled / disabled at Item level.
- Provision made to use official WhatsApp API to send messages to WhatsApp through BUSY. Official WhatsApp API requires WhatsApp desktop version to be installed in computer and this desktop version pops up every time a message is sent to it. Sending messages in bulk in background is not possible. More details in help document/video.

**Minor Changes**

- Provision made to generate E-Way Bill within E-Invoice. Can be specified in *Transport Details* form during voucher feeding. If this option is used, E-Way Bill gets generated along with E-Invoice and need not be generated separately.
- While specifying *Transport Details* in Sales voucher, provision made to specify *Dispatch Party & Address* also as required in E-Invoice generation where Billing Details and Dispatch Details are different.
- Changes in auto generation of TCS vouchers:
  - a. Till now vouchers were always being created as *Journal*. Now provision made to create vouchers as either *Journal* or *Dr Note*.
  - b. TCS amount was always being considered as total TCS amount for the period and TCS already charged was being ignored. Now it will be total TCS amount minus TCS already charged.
  - c. Provision made to round off TCS amount.
- 'Receipts Eligible for TCS' report, it was possible to specify start date before 01-10-2020 (from when the TCS on Receipt was introduced) creating confusion in report. Now it has been restricted and start date cannot be before 01-10.2020.
- Provision made to skip TDS reference creation (like TCS) in vouchers. Required when user wants to maintain TDS ledgers only and not references (required for return filing). Can be enabled in TDS configuration.
- GST 'Monthly ITC Tagging' utility, provision made to tag *Import* transactions also. Till now only *B2B & CDNR* were allowed.
- Trial Balance–Alphabetical; provision made to show balances of upto last three years along with current year balances.
- Dr/Cr Note feeding; in GST Details window, If 'Nature of Transaction' was left blank, no warning was being shown creating confusion in reporting. Now blank 'Nature of Transaction' will not be allowed.

- Invoice/Documents printing standard configuration, provision made to print *User's Signature Image*.
- Invoice printing standard configuration; provision made to print *E-Invoice details (IRN, Ack. No. & Ack. Date)*.
- Dr/Cr Note printing standard configuration, provision made to print *TCS Amount*.
- Advanced Invoice configuration; picking default configuration using ALT+D, field for *E-Invoice QR Code* was not being picked. Now it will be picked if the same was enabled in standard configuration.
- While sending pending Alerts, same were being sent on LIFO basis. Now it will be sent on FIFO basis.
- 'Account Monthly Summary (Horizontal)' was not getting filtered on Master Series Group (if enabled for user). Now it will be filtered.
- 'Regenerate Production Vouchers' utility; if any voucher could not be saved due to RM going negative or due to any other reason, no message was being shown that voucher could not be regenerated. Now message will be shown in case voucher could not be regenerated.
- Specifying E-Invoice credentials in BUSY and those being different from E-Way Bill credentials, a warning message will be shown to match the same as currently different credentials for E-Invoice & E-Way Bill are not working.
- Item multiple alias data feeding; while scanning alias(s) from barcode, sometimes wrong characters were being picked as this form was not accepting data from barcodes properly. Now a check box has been provided in the form to enable alias reading from barcode.
- 'Missing Voucher Nos.' report options; after specifying the Voucher series, 'Suffix & Prefix' were not getting updated automatically in a few cases. Now it will be picked automatically in all cases.
- Changes in 'Merge Masters' utility:
  - a. Quotation vouchers were not getting changed. Now it will be changed.
  - b. *Sales/Purchase Challans* were not getting changed whereas *Sales/Purchase against Challan* was getting changed creating confusion. Now *Sales/Purchase against Challan* will not be changed.
- Item-wise tax applied on Item level or through Bill Sundry at voucher level, sometimes there was a gap of 1 paisa in tax calculation between these two methods. Now tax will be same in both the methods.
- Invoice field <TOTAL\_TDS\_ACC\_AMT> was showing TDS ledger amount involved in a voucher. Now it is renamed as <TOTAL\_TDS/TCS\_ACC\_AMT> and it will show total TDS/TCS ledger amount involved in a voucher.
- Comparing current year closing with last year closing balances to check for any mismatch; till now type of ledger (General/Sub) was not being compared which was creating confusion. Now it will also be compared along with balances.

- 'Bulk Generation of Invoice from Challan' utility; *Station & Pin Code* as specified in Party master was not being picked if the same was not specified in *Transport Details* in challan. Now in such cases it will be picked from Party master.
- TDS/TCS payment voucher, till now Bank's *BSR Code* was being picked from the alias field of Bank account master. Now it will be asked during payment voucher feeding (default will be picked from alias of Bank account master).
- Items having Item-wise discount on absolute basis were not being considered for consolidation at the time of saving even if there was no discount and only absolute mode was enabled in voucher series. Now if some discount has been specified with Item only then it will be skipped out of consolidation.
- 'Block Masters' utility; in master's dropdown list, additional information along with master's name was not being shown. Now it will be shown.
- TDS/TCS reference window, after adjustment of full amount, cursor was moving to next row instead of moving to OK button. Now in such scenario cursor will move to OK button.
- While sorting any screen report after summarising the same, wrong totals were being displayed. Now sorting or reports after summarising has been restricted.
- Provision made to enable VAT for country 'Oman'.
- New fields <ACCOUNT\_INTEREST\_RECEIVABLE> & <ACCOUNT\_INTEREST\_PAYABLE> added in Account master bulk updation and Excel import.
- SQL mode; while sending any report as Email attachment, in name of PDF file, company code was being embedded instead of company short name. Now company short name will be embedded instead of company code.
- *Sales Acc. or Purchase Acc.* input in Sales/Purchase voucher, caption for these data fields was changeable but it was not taking effect during data entry. Now change of caption for these fields has been restricted.
- Account Monthly Summary; graph was not being shown if comparison was being done with previous years(s). Now if the comparison is being done with last one year, graph will be shown and if done with more than one year, graph will not be shown.
- *Transaction* → *Misc. GST Utilities* menu; separate menus for 'E-Way Bill Management' & 'E-Invoice Management' was provided. Now a single menu (along with sub menus) provided with caption 'E-Way Bill & E-Invoice Management'.
- Barcode label printing; if <SQL\_QUERY\_NUM> field was used, two text boxes were being shown without any caption creating confusion. Now these text boxes will not be visible.
- Re-downloading of GSTR-1/2B/3B for previous months has been restricted as these returns cannot be changed once filed and re-downloading does not server any purpose.

**Bugs Removed**

- Account having some closing balance in current year, if deleted and balances carried forward for 'New and Changed Masters' only, the impact of deleted master was not being shown in next year. Now problem rectified.
- *Billing/Shipping Details* window, caption for 'DL No.' was not visible fully. Now problem rectified.
- Payment/Receipt voucher; if checklist details were enabled, *Cur. Bal.* was not being shown fully. Now problem rectified.
- Batch-wise Stock report was not taking effect of Master Series Group tagging on Material Centres. Now problem rectified.
- Parameterised Columnar report was not getting generated if any prefix space was specified in report format name. Now problem rectified.
- <GR\_DATE> field used as custom column was generating error. Now problem rectified.
- User Dash-board, option 'Include Sales return' was not working for *Daily Sales* section. Now problem rectified.
- Importing Account masters from Excel, if size of 'Default Sale/Purchase Type' field was more than 20 characters, same was not getting saved in Account master. Now problem rectified.
- Balance Sheet generated for a specific date; while printing Trading Account, Closing Stock was not getting printed. Now problem rectified.
- Dr/Cr Note Register, sometimes GST related fields as custom column were generating error. Now problem rectified.
- Voucher template tagging enabled; sometimes while loading data from template, some value in Bill Sundry was being shown. Now problem rectified.
- 'Purchase/Expense-wise ITC' report was not showing *Fixed Assets* accounts entry fed through Dr/Cr Notes. Now problem rectified but user will have to resave the existing Dr/Cr Notes with *Fixed Assets* accounts.
- Brokerage Calculation report if generated for both Sales & Purchase, Sales/Purchase Challans were also being included. Now problem rectified.
- Downloading GSTR-2A/2B JSON file, an error was being shown if State was 'Dadar and Nagar Haveli and Daman & Diu'. Now problem rectified.
- 'Allow Sales Return in Sales' option was sometimes not working properly if Compound Discount was enabled. Now problem rectified.
- Price change disallowed for a user for a specific voucher type, user was not able to change price for other voucher types also in item parameter details window. Now problem rectified.

- Data exchange through BDEP; if Party already existed in target data, Address & other details for the same was getting modified during data exchange. Now problem rectified.
- Sending Payment Reminders through SMS/BNS and option 'Skip blank Mobile Nos.' enabled, sometimes an error was being generated. Now problem rectified.
- POS data entry:
  - a. Stock Transfer voucher and some accounting being done through Bill Sundry, Bill-by-bill details window was not being shown for accounting entry. Now problem rectified.
  - b. Label showing *Gross Receipt & Sales* for TCS was sometimes not being shown properly. Now problem rectified.
  - c. On clicking *Voucher Other Info* button, E-Invoice related details were not being shown. Now problem rectified.
- Multi-company Trial Balance Grouped, wrong totals were being shown. Now problem rectified.
- GST 'Monthly ITC Tagging' utility, sometimes wrong Party name was being shown. Now problem rectified.
- Trial Balance Detailed; if any row was deleted using F9 key, decimal places in totals were getting disturbed. Now problem rectified.
- Sales Analysis Voucher-wise generated for a sub user; in list of voucher series, no series was being shown. Now problem rectified.
- Stock Journal created through Physical Stock voucher with Item Batch details; cost price of Batch was being shown as zero in 'Batch Details' report. Now problem rectified.
- Item-wise Discount report, effective discount was being shown in case of compound discount even if nature of discounts(s) was different. Now problem rectified.
- BCN-wise Profitability report was considering tax inclusive prices in case of tax inclusive transactions. Now problem rectified.
- Item Mast MRP field used as custom column in reports was not showing correct value if multi-branch was enabled and branch-wise MRP was specified. Now problem rectified.
- Multiple Columns Cash/Bank Book configuration; if more than one row was left blank, an error message for duplicate entry was being shown. Now problem rectified.
- Deactivating any MC, same was being shown during Item-wise MC data entry if option 'Do Not Show Zero Stock MC' enabled. Now problem rectified.
- Item parameter-wise data entry with Alt. Unit enabled; sometimes while saving voucher, an error was being shown for parameter stock going negative even if stock was there. Now problem rectified.
- Receipt feeding in multi-currency; while printing Receipt, 'Rs.' was being printed instead of currency specified in voucher. Now problem rectified.

- Challan-wise Statement; after refreshing the report, *Total Entries* field was getting doubled. Now problem rectified.
- E-Invoice generated for a Sales voucher; during modification if voucher type was changed using F6 key, *E-Invoice Ack. No. & Date* was getting retained in modified voucher. Now problem rectified.
- Printing Item barcodes from voucher, field <PKG\_UNIT> was not printing any value. Now problem rectified.
- Printing accounting voucher; instead of currency decimal places as specified in configuration, 2 decimal places were being used to print numeric figures. Now problem rectified.
- Settlement enabled and complete amount settled for Sales voucher; amount of Sales voucher was not being included in *Gross Sales* amount for Party in order check TCS applicability. Now problem rectified.
- Provision made to search any field caption using F3 key on standard invoice configuration form.
- Modifying a voucher and saving after making some changes; 'Round Off' Bill Sundry was being applied again without removing the original 'Round Off' Bill sundry applied during voucher creation. Now problem rectified.
- *Call Allocation* voucher date being same as *Call Receipt* voucher date; in case of Nepali Date, *Call Allocation* voucher could not be saved. Now problem rectified.
- Generating GST Summary using short cut key (ALT+G) and then switching between connected reporting using shortcut keys or side panel, sometimes an error was being generated. Now problem rectified.
- Sales voucher feeding with Item-wise tax, if amount of an Item was changed using calculator, corresponding tax amount was not being recalculated as per new amount. Now problem rectified.
- Item Parameter-wise data entry in Alt. Unit and transaction price being specified at parameter level, sometimes the parameter-wise nett amount in reports was showing difference of a few rupees as compared to the amount specified in parameter row. Now problem rectified.

[Back](#)

**Release 1.2 (21-01-2021)****Minor Changes**

- 'Bulk Payments' utility; in case of consignment, it is renamed as 'Bulk Payments for Consignment'.
- 'Bulk Payments for Consignment' utility, TCS & Discount will be pushed in voucher narration while generating Payment vouchers. Same is required to be printed in documents & reports.
- Invoice field <TOTAL\_TDC\_ACC\_AMT> was showing TDS amount on the basis of TDS ledger in an invoice. Now this field renamed to <TOTAL\_TDS/TCS\_ACC\_AMT> and it will show either TDS or TCS ledger amount whichever is involved in voucher.
- TCS data entry, caption for *TCS Category* changed to *TDS Section and TCS Sub Category* changed to *TCS Collection Code*.
- Downloading GSTR-2B, Dr/Cr Notes were not being saved. Now it will be saved.

**Bugs Removed**

- Import vouchers from Excel, while specifying default % for Bill Sundries, if value was more than 9 then same was getting converted into \*\*\*\*. Now problem rectified.
- Job Work transaction; if finished goods references picked through F11, parameter details in references were not getting picked. Now problem rectified.
- If any Party was used in a non-impact Bill Sundry in any Sales voucher and TCS was also charged, sometimes the Party specified in Bill Sundry was being shown in TCS reports instead of main Party. Now problem rectified.
- Download and saving GSTR-2B in SQL mode, sometimes an error was being generated. Now problem rectified.
- Columnar Sales Register, totals for field <SETTLEMENT\_PARTY\_AMT> was not being shown. Now problem rectified.
- Stock Valuation method 'Last Purchase' was not picking 'Purchase against Challan' vouchers. Now problem rectified.
- Importing data in Mobile App in SQL mode, an error was being generated if no. of entries were more than 100 in any Account Ledger. Now problem rectified.

[Back](#)

**Release 1.1 (07-01-2021)****Minor Changes**

- Basic Edition, provision made for GSTIN & HSN validation within BUSY. Will be available with an active BLS.
- If Account Op. Bal. was frozen in 'Data Freezing' utility, user was able to change Op. Bal. Bill-by bill references. Now opening references will also be frozen in this scenario.
- Sales voucher feeding with Item-wise discount on *Absolute* basis and Item consolidation also enabled; Items were not getting consolidated properly and Item amount was getting disturbed. Now Items with *Absolute* discount basis will not be considered for consolidation and a message will be shown for the same.
- Branch user login; while creating new Account and specifying some Op. Bal., same was being considered as full Op. Bal. for that Account instead of Op. Bal. for that branch. Now if branch-wise Op. Bal. are being maintained in other Accounts, this Op. Bal. will also be treated as branch Op. Bal. instead of full Op. Bal.
- Journal Voucher, width of label showing total for *Debit Amount* increased slightly to take care of big figures.
- BNS notification sent in offline mode; while sending those offline notifications, connected details for Broker/Party were not being sent and user was not able to connect with Broker/Party using BNS App. Now connected details will be sent in offline notifications also.
- While registering BUSY, it was possible to leave address as blank. Now address cannot be left as blank.
- Invoice printing configuration, new field <EINVOICE\_REQUIRED> provided.
- Pending alerts for a user were not being sent in background through other user login. Now it will always be sent irrespective of user login.
- Generating any statutory report, value specified in field 'Special Characters to Remove' was not getting saved in background. Now it will be saved and shown next time when report is generated.
- Minor changes in showing E-Invoice details on screen before generation of E-Invoice.
- While generating E-Way Bill, sometimes the same could not be generated due to mismatch in distance being specified between pin codes. Now provision made to leave the distance as 0 and E-Way Bill API will automatically calculate the distance for E-Way Bill.

**Bugs Removed**

- IBP addon was not working in Standard/Enterprise edition while barcodes were being printed through vouchers. Now problem rectified.

- Scheme applied in a voucher; after application of scheme if any other Item was added or existing Item was modified, scheme was getting applied again. Now problem rectified.
- Sometimes QR Code for E-Invoice was not being printed on Windows Server OS. Now problem rectified.
- Access2SQL data conversion; GST Reconciliation related data was not getting converted. Now problem rectified.
- What's New in Help menu was showing release note for BUSY 18. Now problem rectified.
- Printing Sales/Purchase Register with GST details, *Totals b/d* section was not printing value of SGST. Now problem rectified.
- 'Multi Company Trial Balance Grouped'; on pressing <ENTER>, no details were being shown. Now problem rectified.
- While saving Email/SMS configuration, sometimes an error 'Please specify a valid Mobile No.' was being shown without any relevance. Now problem rectified.
- Minor corrections in Account Ledger when non-impact Bill Sundry was used in voucher.
- Cheque printing for PDC, same was not being shown as printed in Cheque printing utility. Now problem rectified.
- Printing Bills Receivable Party-wise, even if there was no data, label *Totals* was getting printed. Now problem rectified.
- Setting Masters Controls for Material Issue voucher, specified *Sale Type* was not getting saved. Now problem rectified.
- 'Account Monthly Summary', graph was not being shown in bottom. Now problem rectified.
- While drilling down 'Pending Sales/Purchase Orders' report, an error was being generated. Now problem rectified.
- Sending notification to BNS App, Party's WhatsApp No. as specified in master was not being sent. Instead Mobile No. was being sent as WhatsApp No. Now problem rectified.
- Multiuser environment and vouchers being saved concurrently; sometimes Ref. Nos. of TCS references were getting disturbed. Now problem rectified.
- Configuring composite barcode structure, 10<sup>th</sup> field specified in structure was not getting saved. Now problem rectified.

## Release 1.0 (30-12-2020)

### Major Changes

- Changes in TCS module:
  - a. Warning for TCS in Sales and/or Receipt is now configurable. Till now it was always being shown.
  - b. Provision made whether to maintain TCS references or not. In some cases users want to maintain ledger only and not references.
  - c. Provision made for auto application of TCS Bill Sundry in inventory voucher or TCS Account in accounting vouchers. User would be prompted to auto apply the same if applicable.
  - d. While using F4 in Sales/Purchase vouchers, TCS will also be applied automatically (if applicable) along with GST.
  - e. TCS warning will be shown in all inventory vouchers. Till now it was being shown in Sales/Purchase/Sales Return & Purchase Return.
  - f. Bill Sundry *Nature*, new option 'TCS' provided. To be used to check if TCS has been applied or not.
  - g. Single entry Payment/Receipt voucher; on selecting any Party, Gross Sales & Receipt was not being shown along with current balance. Now it will be shown.
  - h. TCS reference management provided in Sales Return vouchers also.
  - i. Gross Sales/Receipt was not being shown in Receipt voucher if entry was done through SubLedger. Now it will be shown.
  - j. While selecting any Party, time was being taken to check the gross Sales and Receipt along with current balance. Now speed improved.
  - k. New report 'Check Receipts eligible for TCS' provided to check Gross Receipts & applicability of TCS on Receipt vouchers for a period. User can also create a consolidated TCS voucher from there only using F4 key. Useful when user wants to charge monthly TCS instead of charging transaction-wise.
  - l. New report 'Reconcile Accounts & TCS' provided to check the discrepancy between TCS ledgers and TCS references.
  
- Changes related to E-Invoice:
  - a. E-Invoicing enabled for Dr/Cr Notes also. Till now it was available for Sales/Sales Return only.
  - b. Provision made to print E-Invoice QR Code on Invoice & Dr/Cr Notes. Can be configured in Standard Invoice & Dr/Cr Note configuration. For advanced configuration field <EINVOICE\_QRCODE> provided.
  - c. Provision made to generate E-Invoice in JSON or Plain Excel format also.
  
- Provision made to bind Softlock with computer's *Static IP* also. Till now softlock could be bound with HDD No. / Machine ID only. Required for hosted servers where HDD No. / Machine ID keeps on changing.
  
- Expense vouchers through accounting vouchers, provision made to specify Party details in GST window itself (like *Separate Billing/Shipping Details* in Sales vouchers). No need to create ledger accounts for all parties from whom some GST expense has been booked.
  
- *South Asia* edition sold in India will not work outside India.

- Item Barcode printing AddOn will now be part of Standard & Enterprise model. No need to buy IBP AddOn.
- Provision made for feeding of *Bulk Receipts* (Same like *Bulk Payments*). Available as **Administration->Bulk Updation->Bulk Receipts**.

### Minor Changes

- Changes in Mobile App (4.0):
  - a. SubLedger data was not available. Now made available.
  - b. Printing Sales Order or checking Party details, Party GSTIN was being printed even if VAT was enabled in company. Now in such case TIN will be printed and PAN will be printed for Nepal.
  - c. Some other minor refinements in Sales Order printing.
  - d. Provision made to show 'Bills Receivable/Payable' summary also. Till now listing of 'Bills Receivable/Payable' was available.
  - e. Provision made in BusyApp to directly call Party or send Ledger/Outstanding pdf to Party through SMS/WhatsApp/Email.
- BusyBNS App (2.0), provision made to directly call the connected Party/Broker or forward the received message (along with pdf) to connected Party/Broker through SMS/WhatsApp/Email.
- Expense feeding through accounting vouchers; in case of *Composition Dealer*, warning messages related to tax were being shown which was not required. Now these messages removed in case of *Composition Dealers*.
- TDS reporting enabled for country Ghana. Caption for TDS will be WHT.
- EWay Bill/E-Invoice generation, provision made to skip the same for Un-Approved vouchers. Can be configured in GST Configuration.
- Provision made to input/modify E-Invoice IRN during data feeding. Available in *Transport Details* window.
- Provision made to capture company's WhatsApp No., TIN & PAN in BDEP configuration. To be used in BusyApp & BNS App.
- Provision made to post *Consolidated RCM Liability* on monthly basis instead of daily basis. Till now it was available on daily basis only. Now user can choose between daily / monthly basis depending upon his requirement. Available as **Transactions->GST Misc. Utility->Check/Post RCM Payable**.
- 'Account/Group Monthly Summary', provision made to show data of upto last 3 years along with current year data for comparison purpose.
- Item barcode printing; new fields <PCKG\_UNIT> & <SALES\_PRICE\_PCKG\_UNIT> provided.

- Transport Details window, *Vehicle No.* will always be captured in capital letters.
- While creating new company, two new TDS Categories will be created for section 194-JA & 194-JB.
- *Minimum Sales Price* as specified in Item master was sometimes being treated as *Tax Inclusive* and sometimes as *Tax Exclusive* depending upon which Sales Type was being used. Now in all conditions MSP as specified in Item master will be treated as *Tax Exclusive* for comparison purposes.
- Voucher Replication on 'Call Receipt' voucher; no voucher was being replicated. Actually replication for 'Call Receipt' was not available. Now 'Call Receipt' has been removed from list of vouchers.
- 'Query on Item Parameter' report, provision made to include zero stock item combinations also.
- E-Way Bill configuration, option *Restrict User to change E-Way Bill Applicability* was available with sub user also. Now it will be available to Super User only.
- GST Configuration, if E-Way Bill / E-Invoice was enabled and *Transport Details in Local Sales/Purchase* was disabled, E-Way Bill/E-Invoice could not be generated. Now provision made that if either of these features are enabled, *Transport Details in Local Sales/Purchase* cannot be disabled.
- While validating GSTIN and writing back data to Account master, *Type of Dealer* was not getting written back. Now it will be written back.
- GSTIN Validation utility in bulk; till now all GSTINs (Validated, Not Validated, and Invalid) were being shown in same colour. Now row colour will be changed as per the status of GSTIN.
- List of Accounts with Op. Balances, if user was connected with a branch, branch balance was not being shown. Instead full balance was being shown. Now branch balance will be shown.
- Sending SMS/Notification through voucher modification, option for *Digital Signature* was not being asked. Now it will be asked.
- List of States being shown in TDS/TCS configuration, 'Telangana' was not being shown. Now it will be shown.
- Sending notification; in message being sent, name of Party was being shown instead of Party name as specified in *Separate Billing/Shipping Details*. Now name as specified in *Separate Billing/Shipping Details* will be shown.
- Depreciation chart was showing depreciation % on the basis of decimal places specified for currency which was creating confusion. Now it will show % in 2 decimal places only.
- New field *WhatsApp No.* added in Account & Broker master to specify Party/Broker WhatsApp No. To be used later on in mobile Apps.
- Exporting any report to Excel, option 'For blank columns copy last non blank value' was copying data from last non blank primary row which was creating confusion in certain reports. Now two options provided,

either to copy from *Last Primary Row* or *Last Row (Any)*. User can choose between these two modes depending upon the situation.

- Report Notes were not available for 'GSTR-1 New Format'. Now made available.
- Two new adjustment types added in 'GST Adjustment Details' window, *ITC to be claimed in Next Period & ITC claimed from Previous Period*. These two adjustment types will help user to match ITC ledgers with actual ITC claimed.
- Item-wise discount applied on *Item Amount* or *Absolute* mode, changing Price in Item Grid was not impacting the final amount as that would have disturbed the discount calculation. Now in this scenario, Price in Item grid will not be changeable.
- If Item Serial Nos. were specified in a voucher; while changing MC, a warning was being shown and Serial No. details were getting deleted. Now no warning will be shown and Serial No. details will be retained.
- Importing inventory vouchers from Excel; while specifying default Bill Sundries, decimal places for Bill Sundry % was 2 which was creating problem in case of TCS. Now decimal places increased to 3.
- Filter on any report, value for option 'Check Sub Details' was not being saved and was being shown as unchecked by default. It was creating problem whenever filter was being applied. Now this value will be saved and will be checked by default.
- 'Bills Payable' report, provision made to show Party's *GST Return Filing Frequency* also.
- Alerts enabled; same were getting saved in background during data entry and were being sent when main form was kept open for around 10 minutes. Now it will be sent after every 10 seconds when main form is kept open.
- While showing List of Companies, provision made to copy grid data to clip board (to be pasted in Excel) using CTRL+ALT+SHIFT+C key.
