

Busy Magic Release Notes

Release 1.2

Release Date: 21 July 2026

★ Featured Highlight

AI-Powered Document Scan

We are excited to introduce the **AI Scan** feature designed to automate and speed up your data entry process:

- **Purchase Automation:** Directly scan purchase bills to automatically capture and create purchase transactions.
- **Supported Formats:** Full support for **PDF, JPEG, JPG, and PNG** files.
- **Multi-Page Scanning:** Scan single documents up to **10 pages** in a single go.
- **Availability:** Exclusively available for active **Busy Magic License** holders.

Improvements & Refinements

- **Standard Printing Export:** Inventory transactions using Standard Printing format can now be directly exported to Excel.
- Introduced the **Split Company** option in the company selection list.
- Provided the **F4 Copy Company Configuration** feature to easily replicate settings when creating a new company.
- Added comprehensive **Data Conversion** utilities: SQL to SQL, Access to SQL, and SQL to Access.
- Enabled real-time display of **Account and Item Current Balances** during voucher entry.
- Introduced an interactive Business Dashboard directly on the home screen.
- Added toggles for **Print E-Way Bill and Print E-Invoice** in the Voucher Series Configuration.

- Enabled options to **create, edit, or log out of a company** directly from the dropdown list when a single company is available, with the **Logout button** highlighted as the primary option.
- Streamlined the settlement window so pressing **F2 to save** the bill automatically picks and applies balance values.
- Made the **Taxable Amount** column directly editable during invoice creation.
- Renamed the main menu **Bill** to **Purchase**.

Introduced a wide range of New Reports:

- Bill Sundry Ledger
- Daily Summary
- Party Cash Summary & Cash Credit Summary
- Inventory Monthly Summary
- Cash Against Invoice
- Cash Flow & Fund Flow
- Unbilled Parties
- Quotation / Order / Challan Statement
- Income & Expenditure
- Profitability Report : Bill-wise, Item-wise & Party-wise
- P&L and Balance Sheet (Non-Corporates)

Bug Fixes

- Corrected the bill-by-bill credit reference popup to display the actual outstanding balance instead of the full invoice amount during partial settlements.
- Resolved an issue where HSN and GSTIN validation services were not functioning properly on client systems.
- Fixed an issue that prevented sub-users from creating or modifying transport details.

Release 1.1

Release Date: 09 July 2026

Improvements & Refinements

- Reorganized the company selection screen by repositioning the **Logout** and **Edit Company** options for quicker access and a better intuitive flow when company is logged in.
- Added keyboard shortcut support allowing you to press the **Esc** key to quickly exit or quit from the current company.
- Enabled the **Fetch details via GSTIN** feature in Demo Mode for both Company and Customer Masters.

Bug Fixes

- **Resolved** the **Newtonsoft.Json.dll** version compatibility issue that was causing installation failures on certain systems.
- **Fixed** the system installer error **SWbemLocator Not Found** which prevented successful installation on specific Windows environments.
- **Corrected** Bill by Bill reference in case of partial settlement is done.
- **Resolved** a Run-Time Error that occurred when pressing '**Enter**' on specific items while modifying an existing voucher.
- Fixed an intermittent bug where newly created items occasionally failed to appear immediately in the item listings.
- Corrected a display issue where entering a Sales Voucher through Cash / Bank incorrectly reflected a negative **(Red)** balance on the Dashboard instead of a positive increase.

Release 1.0

Release Date: 01 July 2026
